IUCN/SSC Polar Bear Specialist Group. Working Meeting, 2002 These proceedings provide an overview of the ongoing
research and management activities on polar bears in the circumpolar arctic Together with the previous 12 proceedings they
provide an historic record of international efforts in protecting polar bears from over harvest and document more recent
concerns of threats arising from increased human activities in both the Arctic and in regions far beyond the realm of polar
bears More proactive management is needed to address limitations in the knowledge of population dynamics New
information indicates that the greatest future challenges to polar bear conservation may be ecological change in the Arctic
due to climate change and pollution The complex global nature of the issues requires international cooperation and
development of diverse new approaches to address them Motor West and California Motor ,1929 The Military
