**Behind the Magic. An Examination of Gender Representations in Disney Princess Feature-length Animations**

Megan Hilditch, 2017-08-22 Bachelor Thesis from the year 2017 in the subject Sociology Relationships and Family grade 75 0 Keele University language English abstract This study offers an examination of gender representations present in the Disney feature length animations incorporated into the Princess Collection The import of such films has become increasingly relevant in recent years due to the increased anxiety around media representations and the development of the Princess franchise into a dominant aspect of Disney In an attempt to test the claims of the existing debate and update the discussion through the inclusion of male protagonists as well as female the method of content analysis was adopted to conduct an in depth analysis of Snow White and the Seven Dwarfs 1937 Beauty and the Beast 1991 and Frozen 2013 This choice of films enables us to trace how these representations have changed over time to reflect the changing attitudes of gender in mainstream society to answer the question of to what extent do Disney princesses represent traditional gender stereotypes After data was collected the results of the content analysis were interpreted by drawing on literature and situating them within their historical context The findings have shown that these princesses have evolved from passive damsels in distress to much more active dynamic heroines Whilst the male characters were found to have experienced less change but have become more feminised However both were found to still be influenced by traditional stereotypical ideas
