## **Distributing Health Care Economic And Ethical Issues:**

**Distributing Health Care** Paul Dolan, Jan Abel Olsen, 2002 This is a new health economics textbook with a difference It is based firmly in the discipline of economics and as such it fills a gap in the health economics market But unlike other texts in the area it is very explicit about the distributive implications of economic models and it provides clear rationale for public involvement in the market for health care It separates the efficiency reasons for public involvement based on notions of market failure from the equity reasons based on the views of society that health care should be distributed according to the notion of health needs rather than according to ability to pay The book illustrates the distributional aspects of money flows in the financing and provision of health care and discusses who are the gainers and who are the losers under different financing arrangements A central part of the book contains a discussion of those techniques that are increasingly being used to aid decisions about how to distribute health care Beyond the parameters included in economic evaluation techniques such as cost benefit analysis and cost effectiveness analysis the book discusses some key ethical issues that are relevant for decision makers when setting health care priorities

**E-Healthcare Systems and Wireless Communications: Current and Future Challenges** Watfa, Mohamed K., 2011-10-31 There has been a dramatic increase in the utilization of wireless technologies in healthcare systems as a consequence of the wireless ubiquitous and pervasive communications revolution Emerging information and wireless communication technologies in health and healthcare have led to the creation of e health systems also known as e healthcare which have been drawing increasing attention in the public and have gained strong support from government agencies and various organizations E Healthcare Systems and Wireless Communications Current and Future Challenges explores the developments and challenges associated with the successful deployment of e healthcare systems The book combines research efforts in different disciplines including pervasive wireless communications wearable computing context awareness sensor data fusion artificial intelligence neural networks expert systems databases and security This work serves as a comprehensive reference for graduate students in bioengineering and also provides solutions for medical researchers who are faced with the challenge of designing and implementing a cost effective pervasive and ubiquitous wireless communication system

**Distributing Health Care** Niall Maclean (editor), 2011-11-17 How ought a society to distribute its publicly funded healthcare resources Few questions are in more urgent need of an answer This multidisciplinary investigation brings together the insights of philosophy clinical science health economics operational research and public policy analysis

Economic Evaluation Julia Fox-Rushby, John Cairns, 2005-11-16 There are so many ways in which health might be improved today and as technology improves the opportunities will increase However there are limits to budgets as well as other resources so choices have to be made about what to spend money and time on Economic evaluation can help set out the value of the costs and benefits from competing choices This book examines how to undertake economic evaluation of health care interventions in low middle and high income countries It covers Ways in which economic

evaluations might be structured Approaches to measuring and valuing costs and effects Interpreting and presenting evidence Appraising the quality and usefulness of economic evaluations Series Editors Rosalind Plowman and Nicki Thorogood *The Ideas and Influence of Alan Williams* Anne Mason, Adrian Towse, 2008 BE REASONABLE DO IT MY WAY The sign on Alan Williams desk revealed his sense of humour a man who invited and relished debate but always recognising that intellectual pursuits were a means to a practical end Perhaps best known for his work within cost benefit analysis Alan Williams was a man of principles who developed guiding values in healthcare economics that embraced and encouraged active intellectual engagement and progression He was concerned with the philosophical and ethical issues that underpin decision making and his courageous intellectual battles bore new ideas and revised ideology This compilation of papers and further discussions arising from the Alan Williams tribute conference provides an analysis of the evolution and current status of key concepts in the field It is highly recommended for health economics professionals and students Economic Analysis in Health Care Stephen Morris, Nancy Devlin, David Parkin, 2007-06-04 Health economics is concerned with the evaluation of the effectiveness of health care particularly by examining the social opportunity costs of alternative forms of treatment The peculiar nature of the market for health care that doctors have a major influence on both supply and demand has attracted attention as has the study of the options available for financing such services Economic Analysis in Health Care provides a comprehensive coverage of both the economics of health care systems and the evaluation of health care technologies It has been written as a core textbook for advanced undergraduate and postgraduate students with knowledge of economic analysis and will appeal to an international audience Adopts an international perspective using examples and case studies from the UK the rest of Europe and other countries Contains detailed exposition of the economic theory alongside relevant examples and applications Focuses on both market related and economic evaluation aspects of health economics some books focus purely on market related aspects Strong author team with very broad experience of writing and teaching health economics *Encyclopedia of Health Economics*, 2014-02-21 The Encyclopedia of Health Economics offers students researchers and policymakers objective and detailed empirical analysis and clear reviews of current theories and policies It helps practitioners such as health care managers and planners by providing accessible overviews into the broad field of health economics including the economics of designing health service finance and delivery and the economics of public and population health This encyclopedia provides an organized overview of this diverse field providing one trusted source for up to date research and analysis of this highly charged and fast moving subject area Features research driven articles that are objective better crafted and more detailed than is currently available in journals and handbooks Combines insights and scholarship across the breadth of health economics where theory and empirical work increasingly come from non economists Provides overviews of key policies theories and programs in easy to understand language **Global Mental Health** Sabine Bährer-Kohler, Francisco Javier Carod-Artal, 2017-10-06 This international survey defines mental health as a basic human

right and tracks the emergence of mental health prevention and promotion as a global priority Locating mental illness within a cycle of negative causes and effects affecting human quality of life the editors identify modern policy barriers to promotion prevention initiatives particularly the favoring of the biomedical health model by major stakeholders The book s selection of successful programs from diverse countries displays a lifespan approach emphasizing the centrality of interdisciplinary educational settings in providing primary and secondary prevention and promotion interventions and the ongoing fight against missing financial investigations discrimination and stigma Together these papers make a forceful argument for rights based responses to worldwide mental health needs as part of the commitment toward global human rights and long term development goals Included in the coverage Mental health priorities around the world Social determinants of mental health Mental health and stigma aspects of anti stigma interventions Promoting social and emotional wellbeing and responding to mental health problems in schools The promotion and delivery of mental health services in primary care settings Economic evaluation of mental health promotion and mental illness prevention Bringing to the fore public health concerns that are too often marginalized Global Mental Health is necessary reading for health professionals health and clinical psychologists psychiatrists medical sociologists and policymakers
