Fath,Søren Nors Nielsen,Federico M. Pulselli,Daniel A. Fiscus,Simone Bastianoni,2015-07-03 Decades of research and discussion have shown that the human population growth and our increased consumption of natural resources cannot continue there are limits to growth This volume demonstrates how we might modify and revise our economic systems using nature as a model The book describes how nature uses three growth forms biomass information and networks resulting in improved overall ecosystem functioning and co development As biomass growth is limited by available resources nature uses the two other growth forms to achieve higher resource use efficiency Through a universal application of the three R s reduce reuse and recycle nature thus shows us a way forward towards better solutions However our current approach dominated by short term economic thinking inhibits full utilization of the three R s and other successful approaches from nature Building on ecological principles the authors present a global model and futures scenario analyses which show that implementation of

the proposed changes will lead to a win win situation In other words we can learn from nature how to develop a society that can flourish within the limits to growth with better conditions for prosperity and well being
