Being And Not Being:

Being and Not Being Richard Iveson,2023-12-06 Against the grain of many contemporary theoretical positions that indulge in delusions of safety and certainty Being and Not Being argues that contingency is definitive of the structure of being itself As a result any predictions about the future founded upon present or habitual states of being are necessarily subject to possible error given the unpredictability that is the condition of all emergent forms of being Rather than signal the absence of an ethical dimension this prior inscription of potential which gives rise to profoundly unforeseen forms of being necessarily invokes an a priori ethical demand that is common to biological and technological systems alike This ethical demand transforms the rules of critical and ethical engagement not simply with other inhuman forms of being but with the future itself Indeed this ethical demand requires us to pose serious questions about the legitimacy and usefulness of any decisions made today on the back of predicted futures that erroneously presume the absolute determinability of all beings lacking the alchemical privilege definitive of life As the exemplary figure of unfounded privilege it is with Hamlet that the question of life ultimately ends replaced instead by the extremophile as the figure of unforeseen futures that simply cannot be imagined in the present To be is the potential to be otherwise that is to say to not be that which a given being is **The Collected Dialogues of Plato** Plato,1961-10-01 The Platonic Forms of the Platonic dialogues Rebecca Newberger Goldstein author of Plato at the Googleplex A landmark one volume edition of the complete Plato in classic translations This is a classic one volume edition of all the writings of Plato generally considered to be authentic The editors Edith Hamilton and Huntington Cairns chose the contents from the work of the best modern British and American translators The volume contains prefatory notes to each dialogue by Hamilton an introductory essay on Plato s philosophy and writings by Cairns and a comprehensive index with cross references to assist the reader with the philosophical vocabulary of the different translators *Theodor Gomperz: Greek Thinkers. The Blackness of Black William David Hart, 2020-10-16 This book explores the relations among blackness antiblackness and Black people within the discourse of the blackness of black This critical discourse developed during the last two decades as scholars explored what Saidiya Hartman describes as the afterlife of slavery Hartman's concept which argues for a troubling continuity between the status of enslaved and emancipated Black people is the pivot between discursive tributaries and trajectories Tributaries of the discourse of the blackness of black comprise five foundational concepts Frantz Fanon's phobic blackness Orlando Patterson's social death Cedric Robinson's racial capitalism and the black radical tradition and Hortense Spillers' flesh The book traces three trajectories within the afterlife of slavery Frank Wilderson's Afropessimism Fred Moten's generative blackness and Calvin Warren's black nihilism This ensemble of concepts enable us to understand what is at state in how we understand the relations among blackness antiblackness and Black people

Philosophy and Language in the Islamic World Nadja Germann, Mostafa Najafi, 2020-11-23 What is language How did it originate and how does it work What is its relation to thought and beyond thought to reality Questions like these have been at the center of lively debate ever since the rise of scholarly activities in the Islamic world during the 8th 9th century However in contrast to

contemporary philosophy they were not tackled by scholars adhering to only one specific discipline Rather they were addressed across multiple fields and domains no less by linguists legal theorists and theologians than by Aristotelian philosophers In response to the different challenges faced by these disciplines highly sophisticated and more specialized areas emerged comparable to what nowadays would be referred to as semantics pragmatics and hermeneutics to name but a few fields of research that are pursued to this day and still flourish in some of the traditional schools Philosophy of language thus has been a major theme throughout Islamic intellectual culture in general a theme which probably due to its trans disciplinary nature has largely been neglected by modern research This book brings together for the first time experts from the various fields involved in order to explore the riches of this tradition and make them accessible to a broader public interested both in philosophy and the history of ideas more generally **The Refractionist** ,1926 Calendar of the Manuscripts of the Most Hon. the Marquis of Salisbury, K.
