Questioning Your Faith

Stephen Robinson, 2004-12-01 There is a disturbing movement in the Western world today based on the principle of anything but Christianity But even believers wrestle daily with faith and understanding of God There are three main areas that cause skepticism and doubt regarding Christianity in both believers and non believers The first is the pursuit of science as ultimate truth This book reconciles the Bible s teachings on sin and salvation with modern science while glorifying the Creator Second because of misconstrued beliefs about human equality the notion that all religions are fundamentally the same has become popular A careful examination of the beliefs of the major religions shows that they are all very different and cannot be reconciled into one universal faith Finally the applications of flawed logic and selective reading to scripture and theology have led many to disregard Christianity as internally inconsistent Here reason and logic are fused with Christian beliefs to show their congruence with a rational God To know God and be saved through his son are the supreme goals of every human but Jesus said that we are in his will if we spread with our mouths the truth we contain in our hearts An objective critique of Christianity allows us to change doubts into confidence from which we can move into bold evangelism
