the late eighteenth century by Italian and French Jesuits the garden described in this book was a wonderland of multistoried buildings fountains labyrinths and geometrical hills It even included an open air theater Through detailed examination of historical literature and representations Zou analyzes the ways in which the Jesuits accommodated their design within the Chinese cultural context He shows how an especially important element of their approach was the application of a linear perspective the line method to create the jing the Chinese concept of the bounded bright view of a garden scene Hui Zou's book demonstrates how Jesuit metaphysics fused with Chinese cosmology and broadens our understanding of cultural and religious encounters in early Chinese modernity It presents an intriguing reflection on the interaction between Western metaphysics and the poetical tradition of Chinese culture The volume will be of interest to scholars and students in a variety of fields including literature philosophy architecture landscape and urban studies and East West comparative cultural studies
