and Healing Michael Winkelmann, Philip M. Peek, 2022-08-23 Divination is an important feature of cultures all over the world. While some may still question the efficacy of divination systems they continue to serve their communities by diagnosing ailments, prescribing healing treatments and solving problems. Yet despite their universality there are relatively few comprehensive studies of divination systems. This volume seeks to fill this gap regarding the use of divination in healing. Here some of the world's leading authorities draw on their own fieldwork and participation in ritual to present detailed case studies demonstrating that divination rituals can have therapeutic effects. As the contributors examine the systems of knowledge that divination articulates and survey the varieties of divinatory experience they seek to analyze divination as an epistemological system, as a social process and as a therapeutic endeavor. While some of their findings reinforce traditional assumptions about the importance of social control, spirit relations and community support in the divination process, the authors place these considerations within new epistemological frameworks that emphasize the use of alternative modes of knowing. In this wide-ranging volume readers will find coverage of classic Ifa systems, Buddhist-influenced shamanic practices in the former Soviet Union, the reconciliation of Muslim beliefs and divinatory practices in Thailand, Native American divination used in diagnosis, Maya calendrical divination in Guatemala, mediumistic and chicken oracle divination among the Sukuma of Tanzania, Ndembu divination focusing on the process of collective healing and divination among the Samburu Maasai of Kenya featuring dialogues from actual healing sessions. Together these contributions argue for new perspectives on the study of divination that emphasize not only the epistemological roots of these systems but also their multifaceted therapeutic functions. *Divination and Healing* is a rich source of both data and insight for scholars of ritual, religion, medical anthropology and the psychology of altered states of consciousness.

Divination and Oracles Michael Loewe, Carmen Blacker, 2021-12-30 First published in 1981 *Divination and Oracles* analyses the religious practices of the ancient world as they have been witnessed from Scandinavia to Tibet and Japan from the third millennium BC until the present day. Divination and the consultation of oracles formed part of the religious practice of the ancient world and are part of the living folklore of the contemporary societies. They are subjects that are of immediate concern to anthropologists and not infrequently to the historians of early science. Written by the specialists in the early history of European and Asian Civilisations, the chapters call on the evidence of the written word of history and the surviving artefacts and inscriptions of archaeology. They describe the different methods that have been adopted and examine the types of question that feature in man's attempt to seek guidance from other powers. The contributions show how an appeal to the irrational can affect the decision of prophet or statesman or the way of life of farmer or sailor and how such an appeal can also stimulate scientific enquiry into the cycles of nature. This book is a must-read for scholars and researchers of religion, comparative religion and ancient history.

Maya Sacred Geography and the Creator Deities Karen Bassie-Sweet,2014-10-22 The Kiche Maya creation story preserved in the sixteenth century manuscript Popol Vuh describes the origin of the world and its people in a setting long assumed to be the Guatemalan central highlands Now a scholar with a deep knowledge of Maya history shows that all of these mythological events occurred at specific locations and that this landscape was the template for the Maya worldview Examining the primary Maya deities Karen Bassie Sweet links geographic features to gods and beliefs She reconstructs key elements of the Popol Vuh to argue that the three volcanoes around Lake Atitlan were the three thunderbolt gods and that the lake was the center of the world She also shows that the Maya view of the creation of humans is centered on corn and examines core beliefs about the corn cycle to propose that the creation myth was established much earlier in Maya history than previously supposed Generously illustrated Maya Sacred Geography and the Creator Deities is a detailed ethnohistorical analysis of Maya religion cosmology and ritual practice that convincingly links mythology to the land A comprehensive treatment of Maya religion it provides an essential resource for scholars and will fascinate any reader captivated by these ancient beliefs
