The sources for this map all come from censuses or housing surveys. Subdivisions were used wherever possible.

"Black" is usually a self-identification, especially in Latin America. This map therefore is not a complete guide for the % of dark-skinned people living in an area, but people who self-identify as black or African-descended, depending on the wording of the census for that country.

## % black population

*Imagining Black America* Michael Wayne, 2014-02-25 DIVScientific research has now established that race should be understood as a social construct not a true biological division of humanity In *Imagining Black America* Michael Wayne explores the construction and reconstruction of black America from the arrival of the first Africans in Jamestown in 1619 to Barack Obama's reelection Races have to be imagined into existence and constantly reimaged as circumstances change Wayne argues and as a consequence the boundaries of black America have historically been contested terrain He discusses the emergence in the nineteenth century and the erosion during the past two decades of the notorious one drop rule He shows how significant periods of social transformation emancipation the Great Migration the rise of the urban ghetto and the Civil Rights Movement raised major questions for black Americans about the defining characteristics of their racial community And he explores how factors such as class age and gender have influenced perceptions of what it means to be black Wayne also considers how slavery and its legacy have defined freedom in the United States Black Americans he argues because of their deep commitment to the promise of freedom and the ideals articulated by the Founding Fathers became and remain quintessential Americans the incarnation of America in the words of the civil rights leader A Philip Randolph div

ethnicity for new immigrant and native born blacks Black Ethnics concludes that racial and ethnic identities affect the ways in which black ethnic groups conceptualize their possibilities for advancement and placement within the American polity The ethnic and racial dual identity for blacks leads to significant distinctions in political behavior feelings of incorporation and policy choices in ways not previously theorized The steady immigration of black populations from Africa and the Caribbean over the past few decades has fundamentally changed the racial ethnic and political landscape in the U S An important question for social scientists is how these new blacks will behave politically in the US Should we expect new black immigrants to orient themselves to politics in the same manner as native Blacks Will the different histories of the new immigrants and native born blacks lead to different political orientations and behavior and perhaps to political tensions and conflict among black ethnic groups residing in America And to what extent will this new population fracture the black coalition inside of the Democratic party With increases in immigration of black ethnic populations in the U S the political social and economic integration processes of black immigrants does not completely echo that of native born American blacks The emergent complexity of black intra racial identity and negotiations within the American polity raise new questions about black political incorporation assimilation acceptance and fulfillment of the American Dream By comparing Afro Caribbean and African groups to native born blacks this book develops a more nuanced and accurate understanding of the new black America in the twenty first century Lastly Black Ethnics explores how foreign born blacks create new ways of defining and understanding black politics and coalitions in the post Civil Rights era
