R. Noronha,1988 *Broadcasting* ,1981-10 *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office,1976 *Cable Television* Felix Chin,1978-04-01 The rapid expansion of the cable television industry during the past 25 years has stimulated an almost equally rapid incxease in the volume of cable television literature being produced each year Moreover the rate of gxowth of the number of publications is increasing of about 7000 articles studies and reports on cable TV published between 1950 and 1977 more than 5000 appeared in print after 1965 Needless to

say the quality and subject areas of all this material vary widely as do the range of treatment and degree of detail that characterize different publications. Because the array of information and sources available is so vast and because the usefulness of the published material is not uniformly high, this bibliography while truly comprehensive in the range of topics covered, aims at judicious selection rather than completeness. I have attempted to provide the reader with all the best material ever published on any topic related to one of the most active areas of broadcasting: cable television. The first section of the bibliography lists general reference materials such as cable television periodicals including publishers' names and addresses and cable television indexes to periodicals and legal digests. The main body of the bibliography contains annotated citations arranged by topic under the following seven categories: general information and history; cable television regulation and policy; cable technology and channel capacity; cable television finance and economics; uses of cable television; cable television and education; and community control and franchises.
