

Isaac Newton

Calculus

Fundamental theorem of calculus:

$$\int (a \text{ to } b) f(x) dx = F(b) - F(a)$$

This theorem connects the concepts of differentiation and integration, stating that the integral of a function $f(x)$ over an interval $[a, b]$ is equal to the difference in the antiderivative $F(x)$ evaluated at the endpoints.

Isaac Newton (1643-1727) was a mathematician, physicist, and astronomer who developed the calculus of infinitesimals, which revolutionized the fields of physics and astronomy.
