## **Cancer Stage Of Capitalism:**

The Cancer Stage of Capitalism John McMurtry, 1999 In this bold new look at the recent uncontrolled spread of global capitalism John McMurtry professor of philosophy at the University of Guelph develops the metaphor of modern capitalism as a cancer Its invasive growth he argues threatens to break down our society s immune system and if not soon restrained could reverse all the progress that has been made toward social equity and stability On every continent in every state there are indicators of profound economic and environmental collapse From the lands of indigenous communities to the currency markets of Asia from the ocean floors to the ozone layer the collapse is all encompassing and deep reaching John McMurtry traces the causes of this global disorder back to the mutating assumptions of market theory that now govern the world s economy He diagnoses the malaise as a pathologist would a biological cancer tracking the delinked circuits of the global system s monetised growth as a carcinogenic disorder at the social level of life organization In the wide lensed tradition of Adam Smith Marx and Keynes McMurtry cuts across academic disciplines and boundaries to penetrate the inner logic of the system s problems Far from pessimistic he argues that the way out of the global crisis is to be found in an evolving substructure of history which provides a common ground of resolution across ethnic and national divisions Reaching beyond conventional textbooks this fascinating study offers a new paradigm which is accessible to intelligent citizens the world over

**The Cancer Stage of Capitalism** John McMurtry, 2013-07-20 The Cancer Stage of Capitalism is a modern classic of critical philosophy and political economy renowned for its depth and comprehensive research It provides a step by step diagnosis of the continuing economic collapse in the US and Europe and has had an enormous influence on new visions of economic alternatives John McMurtry argues that our world disorder of unending crises is the predictable result of a cancerous economic system multiplying out of all control and destroying ecological social and organic life a process he describes as global ecogenocide In this updated edition he explains the social immune response required to fight this cancer prescribing developments akin to the Occupy movement and the Pink Tide democratic social transformation occurring in Latin America In a global cultural orthodoxy that is increasingly hostile to life this book shows the necessity and possibility of building a sustainable society based on a universal commitment to nature and humanity **Globalization and Community**
