industrialization urbanization pollution deforestation and hunting Some eagle species have consequently experienced extreme population changes There are however some positive developments Eagles have a strong historic bond with human civilization due to their status as the world s most charismatic birds Conservation policies have also been successful in repopulating some ecosystems with breeding eagles Therefore despite the complexity of this relationship there may yet be hope for this unique species group frequently rated as the kings of birds and symbolic of human power ambition royalty nationality and even concepts of God It is hoped that this book will contribute to the further understanding of these unique and fantastic birds
