Blenheim Strike:

Blenheim Strike Theo Boiten,1996-06 This story of early Blenheim operations is vividly and grippingly illustrated by the personal accounts of the aircrew who survived *Daylight Bombing Operations, 1939-1942* Martin W. Bowman,2015-05-30 There are no records of war more valuable than the first hand accounts of the individuals who were actually there The vivid honesty of the stories on display here brings into sharp focus the personal fears as well as the sheer exhilaration of flying sorties by day often through heavy flak sometimes at hedge hopping or wave skimming heights as the squadrons of Blenheims Mosquitoes Mitchells and Venturas swept across the Continent towards their targets From the outbreak of the Second World War to the eve of VE Day the medium bomber crews of 2 Group RAF and 2nd Tactical Air Force flew vital operations over Europe Here their story is told month by perilous month often in the words of the airmen themselves their accounts supported by meticulous research Their exploits include the first sorties of the war the famous Operation Oyster to bomb the Philips works at Eindhoven and other low level pinpoint attacks against key targets in occupied Europe and Scandinavia While sharing in the triumph of their bombing successes we are not spared details of the appalling sacrifices and the failed and aborted raids These details are relayed in a series of poignant personal snapshots highlighting the extraordinary valour of these ordinary men Remarkable photographs include aerial views of targets under attack as well as dramatic portraits of the aircraft involved This book serves as a moving tribute to the efforts of the pilots involved in some of the most perilous daylight bombing operations of the Second World War **The Battle Of France** Peter Cornwell,2008-02-28 Peter Cornwell tells the story of the greatest air battle of the Second World War when six nations were locked in combat over north western Europe for a traumatic six weeks in 1940 He describes the day to day events as the battle unfolds and details the losses suffered by all six nations involved Britain France Holland Belgium Germany and rather belatedly Italy As far as RAF fighter squadrons in France were concerned it was an all Hurricane show yet it was the Blenheim and Battle crews who suffered the brunt of the casualties Every aircraft lost or damaged through enemy action while operating in France is listed together with the fate of the crews The RAF lost more than a thousand aircraft of all types over the Western Front during the six week battle the French Air Force 1 400 but Luftwaffe losses were even higher at over 1 800 aircraft *A History of the Mediterranean Air War, 1940-1945* Christopher Shores,Giovanni Massimello,Russell Guest,2012-06-19 This first volume in the seminal series on World War II aerial combat pilots and tactics that reads like an encyclopedia on the subject Portland Book Review In the early days of World War II both Allied and Axis powers extended the theater of war to North Africa where hard fought battles were conducted in the harsh desert But before anyone could claim victory on the ground they had to hold dominion in the air Here historian Christopher Shores has combined his books *Fighters over the Desert* and *Fighters over Tunisia* into one volume as well as adding updated information about the deadly fighter aircraft reconnaissance aircraft and maritime units active in the Mediterranean Full of in depth research and

featuring essential maps this is an intimate introspection by these men of their experiences and the respect that they shared not only for each other but also their adversaries The Military Reviewer [Malta Strikes Back](#) Ken Delve,2017-06-30 A detailed account of the air operations based around Malta during the long siege of the island during World War II Two of the greatest strategic mistakes by Hitler involved failure to take control of two key locations Gibraltar and Malta between them these two were able to influence and at times dominate the Western Mediterranean area and surrounding land masses Malta with its strategic partner Alexandria and Egypt likewise dominated the Eastern Mediterranean and surrounding land masses Malta only existed strategically for its ability to attack the enemy Lines of Communication between European bases now stretching from France to Crete and North Africa Every piece of equipment every man and all supplies had to move from Europe to North Africa the majority by surface vessel and had to be gathered at a limited number of port facilities in both locations which made those locations key choke points and targets Once in North Africa everything had to move along the main coastal road from the supply ports to dumps and to units Every campaign is to a greater or lesser extent one of logistics the Desert War more so than most It has often been called a war of airfields but it is more accurately described as a war of logistics with airfields playing a major role in defending one's own supply lines whilst striking at the enemy's lines If Malta could not attack then it was a drain on resources but in order to attack it had to protect the infrastructure and equipment needed for attack The ability to take a pounding shake it off and fight back was the key to survival The Island required determined leadership external support dedicated to supplying the Island and the committed resilience of all those on the Island to ensure success This is the story of how Malta rose to meet the challenges facing its defences during the Second World War how it struck back and survived one of its darkest eras [The Reich Intruders](#) Martin W. Bowman,2006-03-19 One of Britain's best known aviation historians provides a moving and exciting account of the light bomber raids by No 2 Group Firetrench This is the story of 2 Group RAF during World War II Much of it is told by the men who flew the Blenheim Boston Mitchell and Mosquito aircraft that carried out many daring daylight and night time raids on vitally important targets in Nazi occupied Europe and Germany These were not the famous thousand bomber raids that hit the wartime headlines but low level fast moving surprise raids flown by small formations of fleet footed and skillfully piloted twin engine light bombers Their targets were usually difficult to locate and heavily defended because of their strategic importance to the Nazis 2 Group also played a vital part in the invasion of Europe both before and after D Day Often they would fly at wave top height across the English Channel or North Sea to avoid detection and then hedge hop deep into enemy territory to deliver their precision attack Enemy fighters and anti aircraft fire were a constant risk This is a remarkable story of skill and bravery by a little known branch of the RAF The most known modern air war historian has made his usual traditionally meticulous and well researched work Through combination of first hand accounts and document sources he describes the exploits of British Commonwealth and Allied twin engine bomber crews who fought and won their own war in Europe's sky bravely and

regardless its cost Mykhaylo Akimov If you are interested in British aviation history then this book would make a good addition to any collection Armorama **Air War for Yugoslavia Greece and Crete 1940-41** Brian Cull, Christopher Shores, 2008-08-21 The air battle for Yugoslavia Greece and Crete began in June 1940 with the Italian declaration of war In the past there has been much controversy amongst air historians on many of the details of the operations It was here for example that Pat Pattie believed by many to be the Royal Air Force s unknown top scoring fighter pilot of the whole war saw most of his action Just how many kills did he achieve and how Taken from extensive research into available British Italian and German records and interviews and correspondence with survivors or relatives of those present this book seeks to provide an accurate portrait of the air war for Yugoslavia Greece and Crete from 1940 41 *International Warbirds* John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts *International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare *A History of Cavalry from the Earliest Times* George Taylor Denison, 1913 **STRIKE FROM THE SKY** HALLION RICHARD, 1989-10-17 Bogen beskriver udviklingen af taktiske luftst tte *The United Service* , 1890 **Colburn's United Service Magazine and Naval and Military Journal** , 1871 **United Service** , 1890 **Coastal Dawn** Andrew D. Bird, 2012-10-24 From the author of *A Separate Little War* a detailed history of the British World War II aircraft and their brave crew In 1940 the defense of Great Britain rested with a handful of volunteer aircrew Churchill s few Overshadowed in later folklore by the more famous Spitfire and Hurricane pilots there were other pilots observers and air gunners just as courageous flying the Bristol Blenheim MKIV F The future of the country and arguably that of the free world depended also on their skill morale and sacrifice Remarkably little has been chronicled of these men and their aircraft the Trade Protection squadrons formed by Hugh Dowding allotted to 11 Group in October 1939 The aircraft s range and endurance made it suitable for defense of coastal shipping against attack on the southern and eastern shores of Britain and for operations further afield Indeed during bitter fighting casualties among Numbers 235 236 248 and 254 Squadron Blenheims were high on operations over Norway Holland France Dunkirk and then the Battle of Britain where the Blenheims

were completely outclassed by Messerschmitt 109 and 110 fighters and fell easy victims scythed from the sky But the record of the aircraft and their crew was an immensely proud one Drawing on contemporary diaries periodicals letters logbooks memoirs and interviews with survivors lauded historian Andy Bird reassesses the vital role they played and repositions it in history In doing so he justifiably embraces the heroes we have left behind Colburn's United Service Magazine and Naval Military Journal ,1871 **History of England, by J.R. and C. Morell** John Reynell Morell,1873 **The dictionary of English history, ed. by S. J. Low and F. S. Pulling** English history,1904 **Country Life** ,1909 **Targeting the Third Reich** Robert S. Ehlers,2009 Argues that air intelligence played a crucial but largely overlooked role in the successful execution of the Allied bombing campaigns against the Third Reich which in turn proved a decisive factor in both ending the war in Europe and ending it as soon as it did **Narrative Series of Historical Readers** ,1873
