Calcium-sensing Receptor:

Calcium-Sensing Receptor Naibedya Chattopadhyay, Edward M. Brown, 2003 Calcium Sensing Receptor provides an overview of various aspects of the calcium receptor's biochemistry, physiology and pathophysiology that is suitable both for those who have been working in the field of Ca^{2+} sensing as well as those who are new to this discipline. Calcium Sensing Receptor is the nineteenth volume published in the Endocrine Updates book series under the Series Editorship of Shlomo Melmed MD.

Physiology and Pathophysiology of the Extracellular Calcium-Sensing Receptor Enikő Kallay, 2018-07-09 Calcium is vital for human physiology; it mediates multiple signaling cascades critical for cell survival, differentiation or death, both as first and as second messenger. The role of calcium as first messenger is mediated by the G protein-coupled receptor, the extracellular calcium-sensing receptor (CaSR). The CaSR is a multifaceted molecule that senses changes in the concentration of a wide variety of environmental factors, including divalent and trivalent cations, amino acids, polyamines and pH. In calcitropic tissues with obvious roles in calcium homeostasis, such as parathyroid, kidney and bone, it regulates circulating calcium concentrations. Germline mutations of the CaSR cause parathyroid disorders, demonstrating the importance of the CaSR for the maintenance of serum calcium homeostasis. The CaSR has an important role also in a range of non-calcitropic tissues, such as the intestine, lungs, central and peripheral nervous system, breast, skin and reproductive system, where it regulates molecular and cellular processes such as gene expression, proliferation, differentiation and apoptosis, as well as regulating hormone secretion and lactation. This Research Topic is an overview of the CaSR and its molecular signaling properties together with the various organ systems where it plays an important role. The articles highlight the current knowledge regarding many aspects of the calcitropic and non-calcitropic physiology and pathophysiology of the CaSR.
