To do this, helping adults need to be equipped and confident to start these conversations. *Conversation Starters for Direct Work with Children and Young People* provides guidance and support for any adult who needs to talk to children about difficult issues. The issues covered include domestic abuse and drug use, mental health issues, adoption and fostering, family illness and bereavement, as well as giving evidence in court. **Sermons and Prayer-meeting Talks Delivered at the N.Y. Hippodrome, by D. L. Moody ... Revised ... with a Full Index to Anecdotes and Illustrations. Arranged by ... H. H. Birkins** Dwight Lyman MOODY, 1876 **The First Principle Talks On Zen** OSHO, 2023-10-20 AUTHENTIC TRUTH CANNOT BE SAID WITH WORDS IT CAN ONLY BE LIVED. In *The First Principle*, Osho captures the unique, colorful, seemingly crazy spirit of Zen through talks on a collection of Zen stories, anecdotes of the often bizarre interchanges between a master and disciple in the quest for truth. From these anecdotes, Osho distills Zen's pragmatic essence for the reader and conveys an alive understanding of its message: the first principle. Speaking to the contemporary, modern reader without robbing these old tales of their magic charm and humor, Osho reminds us: You are the shrine for the first principle. So the only way is to go within. Turn in. That is what meditation is all about. *Candle Talk* Barbara Birenbaum, 1991 Kindl meets some unusual candles and learns about Hanukkah.

*Handbook of Research on Automated Feature Engineering and Advanced Applications in Data Science* Panda, Mrutyunjaya, Misra, Harekrishna, 2021-01-08 In today's digital world, the huge amount of data being generated is unstructured, messy, and chaotic in nature. Dealing with such data and attempting to unfold the meaningful information can be a challenging task. Feature engineering is a process to transform such data into a suitable form that better assists with interpretation and visualization. Through this method, the transformed data is more transparent to the machine learning models, which in turn causes better prediction and analysis of results. Data science is crucial for the data scientist to assess the trade-offs of their decisions regarding the effectiveness of the machine learning model implemented. Investigating the

demand in this area today and in the future is a necessity The Handbook of Research on Automated Feature Engineering and Advanced Applications in Data Science provides an in depth analysis on both the theoretical and the latest empirical research findings on how features can be extracted and transformed from raw data The chapters will introduce feature engineering and the recent concepts methods and applications with the use of various data types as well as examine the latest machine learning applications on the data While highlighting topics such as detection tracking selection techniques and prediction models using data science this book is ideally intended for research scholars big data scientists project developers data analysts and computer scientists along with practitioners researchers academicians and students interested in feature engineering and its impact on data
