*Bad News* Rob Brotherton,2020-05-14 From the bestselling author of *Suspicious Minds* There was a time when the news came once a day in the morning newspaper A time when the only way to see what was happening around the world was to catch the latest newsreel at the movies Times have changed Now we re inundated The news is no longer confined to a radio in the living room or to a nightly half hour timeslot on the television Pundits pontificate on news networks 24 hours a day We carry the news with us getting instant alerts about events around the globe Yet despite this unprecedented abundance of information it seems increasingly difficult to know what s true and what s not In *Bad News* Rob Brotherton delves into the psychology of news reviewing how the latest research can help navigate this supposedly post truth world Which buzzwords describe psychological reality and which are empty sound bites How much of this news is unprecedented and how much is business as usual Are we doomed to fall for fake news or is fake news fake news There has been considerable psychological research into the fundamental questions underlying this phenomenon How do we form our beliefs and why do we end up believing things that are wrong How much information can we possibly process and what is the internet doing to our attention spans Ultimately this book answers one of the greatest questions of the age how can we all be smarter consumers of news

about what might have been plan and anticipate the future create fictional relationships and worlds and consider alternatives to the actual experiences of their lives The Oxford Handbook of the Development of Imagination provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought The topics covered include fantasy reality distinctions pretend play magical thinking narrative anthropomorphism counterfactual reasoning mental time travel creativity paracosms imaginary companions imagination in non human animals the evolution of imagination autism dissociation and the capacity to derive real life resilience from imaginative experiences Many of the chapters include discussions of the educational clinical and legal implications of the research findings and special attention is given to suggestions for future research
