Glocal English Farooq A. Kperogi,2015-06-22 Glocal English compares the usage patterns and stylistic conventions of the world s two dominant native varieties of English British and American English with Nigerian English which ranks as the English world s fastest growing non native variety courtesy of the unrelenting ubiquity of the Nigerian English language movie industry in Africa and the Black Atlantic Diaspora Using contemporary examples from the mass media and the author s rich experiential data the book isolates the peculiar structural grammatical and stylistic characteristics of Nigerian English and shows its similarities as well as its often humorous differences with British and American English Although Nigerian English forms the backdrop of the book it will benefit teachers of English as a second or foreign language across the world Similarly because it presents complex grammatical concepts in a lucid personal narrative style it is useful both to a general and a specialist audience including people who study anthropology and globalization The true life experiential encounters that the book uses to instantiate the differences and similarities between Nigerian English and native varieties of English will make it valuable as an empirical data mine for disciplines that investigate the movement and diffusion of linguistic codes across the bounds of nations and states in the age of globalization

Conceptualizations is a monograph which is concerned with African cultural conceptualizations in Jamaican It contributes to the study of Transatlantic relations between Africa and Jamaica and in particular to the understanding of African influences in Jamaican linguistic practices The book constitutes a first study of these phenomena from a cognitive linguistic perspective and investigates traveling conceptualizations at the intersection of language culture and cognition The author explores Jamaican linguistic practices in different domains namely conceptualizations involving parts of the human body conceptualizations of events roles and relations underlying serial verb constructions and conceptualizations of kinship and names The study can be regarded as an innovative contribution as it looks not only at linguistic expressions on the surface but discusses the underlying cultural and cognitive basis of semantic structures The study thus aims at making African Jamaican connections on the conceptual level visible and also discusses notions of consciousness agency and emblematicity
