Evans, Janet H. Wood, 2012-12-06 In 1993 we began to consider the possibility of holding a conference on Cataclysmic Variables CVs at Keele University There have been several meetings in the area of CVs recently e g Eilat Abano Padova Capetown However as preparations for the Keele meeting progressed we realized that while there had been a number of IAU meetings devoted to related and to peripheral topics such as IAU Colloquium 122 on Classical Novae

in 1989 IAU Colloquium 129 on Accretion Disks in 1990 there had been no IAU sponsored conferences in the area of cataclysmic variables CVs for a number of years We felt therefore that the time was ripe to have an IAU meeting devoted to an overview of CVs and related objects and the SOC organized the conference such that there was an emphasis on invited reviews of the most recent advances in the field The conference covered both CVs and LMXBs and the inter relations between them The meeting was held at a time when powerful satellite observatories and rapid improvements in ground based instrumentation had led to many advances in both CV and LMXB research The conference provided a forum to review observations from ASCA EUVE ROSAT Ginga and the recently refurbished HST Photo metric spectroscopic and polarimetric observations of CVs and LMXBs have thrown new light on the distribution of matter and the nature of the stellar components in these systems *Scientific and Technical Aerospace Reports*, 1986 *Catalog of Einstein (HEAO-2) Observations, July 25, 1986* Frederick D. Cataclysmic Variables. Recent Multi-Frequency Observations and Theoretical Developments H. Drechsel, Y. Kondo, Jürgen H. Rahe, 2012-12-06 Recent advances in observational and theoretical efforts in understanding the nature of cataclysmic variables had reached such maturity that there existed a strong shared feeling among the workers in this field that an international colloquium sponsored by the International Astronomical Union would be timely To be more specific this was due primarily to the accumulation of the new data from satellite observatories such as the International Ultraviolet Observatory IUE and EXOSAT as well as ground based optical and radio telescopes and the advances in modeling the putative accretion disks and the thermo nuclear runaway phenomena in the vicinity of the white dwarf stars in cataclysmic variables A series of workshops on this subject held in North America over the past several years and that held in Europe in 1985 had all contributed to the advances in our knowledge that led to IAU Colloquium No 93 held in Bamberg from the 16th to 19th of June 1986 In all 157 astronomers from 27 countries participated in this conference Judging from the papers presented both invited and contributed and from the

enthusiasm seen in discussions the meeting was indeed a success **Harvard Observatory Monographs** ,1930
