of Basic Joseki Yoshio Ishida,1997 The 3-3 Point Modern Opening Strategy Ch'i-hun Cho,1991 Opening theory in go has a
long history and has undergone many changes In the 17th through 19th centuries the first move in the corner was usually
played on the 3 4 point or occasionally the 5 3 or the 5 4 point The star point was almost never played Then in the mid 1930s
the New Fuseki became the vogue The star point became a key feature and emphasis was placed on central influence In
present day opening theory the star point still carries great weight since it occupies the corner in one move has a powerful
influence along the sides and permits a much faster development than the 3 4 point Its weakness lies at the 3 3 point from
which the corner territory can easily be destroyed However more and more openings are being played today which
emphasize tight territorial control Here again the 3 3 point is critical whether played to secure the corner territory with one
move or to destroy the opponents corner territory In these openings many questions arise about joseki in relation to the
surrounding positions In other words joseki cannot be confined to just one corner or just one side the whole board must be
taken into account This book analyzes the role of the 3 3 point in opening strategy and features examples taken from about
100 of Chi Chikun s games The opening is the most enjoyable part of the game to study It is also the most intuitive part of the
game and its concepts are the easiest to grasp Any reader who knows the rules should make effortless progress by reading
this book **All about Life and Death** Chì-hun Cho,1993 All About Life and Death The most complete work on tsume go
ever published in English Life and Death is a critical subject area for go players Cho leads the reader through all of the
important patterns that occur in play Because of the vast range of material included beginners will profit from the book while
experts will still find a challenge For beginners through dan level players Use it as a text to study life and death in detail Use
it as a problem book to sharpen your reading skills Use it as an encyclopedic reference Volume 1 covers basic corner shapes
and the comb pattern Volume 2 analyzes the carpenter square shapes on the sides and corner shapes arising from josekis
and attacks on corner enclosures About the Author Cho Chikun is the foremost Korean practitioner of the Game of Go He
began his professional study at the game of six becoming the youngest ever professional at 11 At the age of 24 he won the
prestigious title Meijin and is the only go player ever to have held all top four Japanese titles at the same time Cover
