Woods Words Walter Fraser McCulloch,2017-07-20 Excerpt from *Woods Words A Comprehensive Dictionary of Loggers Terms* The first American colonists were virtually obliged to invent words and terms to describe the unfamiliar landscape and weather the strange ora and fauna confronting them even the methods of survival in a savage wilderness Survival for a majority of settlers consisted of making a clearing primarily for agriculture but it wasn t long before they were exporting clapboards and deals and masts As early as 1631 settlers in present Maine had an authentic sawmill operating by water power Lumber is thus as old an industry as we have in the United States In early times the felling of trees and the converting of logs into lumber was carried on by the same workmen They all were called lumberers whether they worked in the forest or the sawmill Less than two centuries later the industry found need to operate in two clearly marked divisions and the professional logger appeared He was the man who would work in the woods or at nothing at all When he had cut the timber and delivered it to the logpond he was done with it Let the boys in the mill do what they would he wanted no part of a sawmill The logger merely paused brie y in the settlement to get his teeth fixed as he put it then returned to his own domain of the forest and began anew to let daylight into the swamp About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
