Archaeology: Historiography and Theory Tim Murray, 2026-01-01 This book examines our understanding of the ways in which we produce and consume archaeological knowledge and proposes that this should play a greater role in our attempts to describe and comprehend the nature and purpose of archaeology and the nature of archaeological knowledge During the past fifty years prehistoric archaeologists have sought to promote or oppose several redefinitions of archaeological goals and approaches that have emphasized variously the liberating or constraining power of critical self reflection While practitioners have continued to expand the storehouse of archaeological data they have also been engaged in active investigation of archaeological goals and approaches and in intensifying debate over what it is proper or relevant for practitioners to do Prehistoric archaeology is now much more than a method of data collection and analysis which is transformed into culture history or exemplifications of material culture theory by the acts of comparison and interpretation The central premise of this book is that the kind of understanding sought here should significantly improve our ability to work towards convincing solutions to many of the practical puzzles and problems with which we currently concern ourselves The author also argues that this understanding will help to redefine the terms under which the collectivity of archaeological practitioners can be considered to be a functioning community

We Are Playing Football Will Rollason, 2010-10-12 Sport is an important part of the lives of rural Papua New Guineans and a significant connection to global imaginaries for economically marginal villagers Such grassroots sport however is rarely studied and has never previously been the subject of an ethnographic monograph This book represents a pioneering study of the history and effects of grassroots sport in Papua New Guinea *We Are Playing Football* explores Panapompom people's attempts to recreate the international game and the social and subjective effects of

this effort From a raw ethnographic starting point the book moves through historical and interpretive materials exploring the motives methods and results of Panapompom people s work to recreate global images of football and to turn them to their own political ends As the argument proceeds we see how playing football implicates Panapompom people in circuits of domination power and humiliation that tether them to colonial modes of control and derogatory racialist identities which they themselves reproduce in their communities From its effects on the most intimate self understanding through the embodied experience of playing football to the details of colonial history and the values and ideas underpinning community life this book offers an original and challenging assessment of what it means to be globalised It charts the new outlooks and imaginaries the disruptions failures and disappointments and above all the vital synergies between different people that define the global situation of Panapompom people

The Rebirth of Anthropological Theory Stanley R. Barrett, 1992-12-15 Innovative and often controversial Barrett's study ranges over the entire scope of anthropological theory It provides a fresh interpretation of the history of theory and mounts an alternative perspective built around dialectics that is eminently suitable to post colonial anthropology He argues that anthropological theory has failed to be cumulative It has been characterized by oscillation and repetition theoretical orientations have appeared and disappeared only to be discovered once again Addressing numerous conceptual contradictions which have never been resolved he introduces novel concepts such as salvage theory and backward theory and argues that in many respects anthropological theory resembles the

structuralists interpretation of myth Social life he asserts is inherently contradictory although concealed by numerous mechanisms most of which reinforce the status quo Attacking the illusion of simplicity which has dominated positivistic approaches and the out dated identification of anthropology with non Western primitive and tribal societies Barrett contends that power and privilege everywhere should be the basic concerns of anthropological inquiry *Scholarly Resources for Children and Childhood Studies* Vibiana Bowman,2007-02-08 Editor Vibiana Bowman has drawn together contributions from some of the leading scholars in the interdisciplinary field of children and childhood studies CCS in this guided approach to literature searching in CCS The contributors to this book are both faculty currently teaching in the area of CCS and academic librarians The charge given to each contributor was to write a chapter that explained the process of scholarly research in his or her own particular area of expertise to a student unfamiliar with that discipline Towards this end the book provides background information about interdisciplinary study in general and children and childhood studies in particular as well as an outline of basic research practices Each contributor serves as a mentor and suggests a search strategy discusses significant concepts and vocabulary and lists the major resources that scholars in that area would be expected to use Not intended as an exhaustive list of in print research resources rather the emphasis throughout this guide is on useful resources and effective research methodologies As the field of CCS continues to evolve in the upcoming years *Scholarly Resources for Children and Childhood Studies* will serve as an excellent stepping stone for those just entering the area **Greater New York**,1925 **Anthropology in the Sudan** Abdel Ghaffar Muhammad Ahmad,2003 This collection of essays on the Sudan highlights the country s critical role in anthropology research and in studies of social change and development in rural Africa Spanning 25 years the scholarship reveals the strengths and weaknesses of anthropology from its exploitive and colonial roots in Africa to its current liberating manifestation While questioning the modernization paradigm this critical discussion does not entirely reject development and reveals how development anthropology can serve as a progressive force on the continent *Native Activism in Cold War America* Daniel M. Cobb,2008 Broadens the scope and meaning of American Indian political activism by focusing on the movement s early and largely neglected struggles revealing how early activists exploited Cold War tensions in ways that brought national attention to their issues *Publications of the Folk-Lore Foundation* Vassar College. Folk-lore Foundation,1929 *Notes on Jamaican Ethnobotany* Martha Warren Beckwith,1928 American Folklore Studies Simon J. Bronner,1986 **Annual Review of Anthropology** Bernard J. Siegel,1978 Annual compilation of critical articles from all areas of the discipline of anthropology *Native Voices* Richard A. Grounds,George E. Tinker,David Eugene Wilkins,2003 Native peoples of North America still face an uncertain future due to their unstable political legal and economic positions Views of their predicament continue to be dominated by non Indian writers In response a dozen Native American writers here reclaim their rightful role as influential voices in debates about Native communities These scholars examine crucial issues of politics law and religion in the context of ongoing Native American resistance to the

dominant culture They particularly show how the writings of Vine Deloria Jr have shaped and challenged American Indian scholarship in these areas since 1960s They provide key insights into Deloria s thought while introducing some critical issues confronting Native nations Collectively these essays take up four important themes indigenous societies as the embodiment of cultures of resistance legal resistance to western oppression against indigenous nations contemporary Native religious practices and Native intellectual challenges to academia Essays address indigenous perspectives on topics usually treated by non Indians such as role of women in Indian society the importance of sacred sites to American Indian religious identity and relationship of native language to indigenous autonomy A closing essay by Deloria in vintage form reminds Native Americans of their responsibilities and obligations to one another and to past and future generations This book argues for renewed cultivation of a Native American Studies that is more Indian centered **Unity** ,1924
