**The Natural Dynamic of Imaginative and Creative Technology** Anthony Ugochukwu O. Aliche,2014-11-07 There is an age old controversy regarding the major source of human knowledgewhether it arises from experience or from reason The Natural Dynamics of Imaginative and Creative Technology presents a revolutionary reconciliation on this topic As an arbitrator in the philosophical battle of mind body dualism as championed by Aristotle and his contemporaries this study offers a balanced approach It stands out as a peculiar and distinct library in the dynamism of knowledge with particular reference to the domain technological prowess Author Anthony Aliche writes with passion as he seeks to represent a stipulative monolith in the ethical pattern of the present and upcoming generations for a clear achievement of the millennial development goals Humanity has launched itself into a detrimental quagmire allowing appetitive elements to gain the upper hand and oversee the affairs of the rational elements To combat that challenge Aliche offers a blueprint that when used in its conclusive mission will uplift humanity beyond the bounds of sense experience and materialism and into the domain of true knowledge and realities      **A Psychology of Body, Soul, and Spirit** Rudolf Steiner,1999-06 11 lectures in Dornach

September 8 19 1924 CW 318 Humans cannot be known by uncreative thoughts because by their very nature human beings are creative One must re create if one wants knowledge With today s passive thinking one can understand only the periphery of the human being one has to ignore the inner being Rudolf Steiner Today we hear a great deal about holistic medicine an approach to healing that integrates body mind and spirit For Rudolf Steiner healing is not possible unless it takes into account all the dimensions that make up a human being both visible and invisible Unless we begin to understand these dimensions of ourselves real health will always be hard to attain To meet inner frailty with truly adequate concepts Steiner describes specific inner structures of both healthy and unhealthy states that escape ordinary perception Addressing topics ranging from sleepwalking to hyperliteracy to the visions of St Teresa of Avila he suggests how to approach the misalignments of nonstandard inner structures and other psychic difficulties with what he calls pastoral medicine a truly holistic healing that can bring body and soul together and help them function in the most effective and powerful way Dr Michael Lipson s foreword provides background for Steiner s lectures and brings them into the context of modern psychology This work is a translation of *Das Zusammenwirken von rzten und Seelsorgern* CW 318 A previous edition was published as *Pastoral Medicine The Collegial Working of Doctors and Priests*      **The Creative Retrieval of Saint Thomas Aquinas** W. Norris Clarke,2009-08-25 W Norris Clarke has chosen the fifteen essays in this collection five of which appear here for the

first time as the most significant of the more than seventy he has written over the course of a long career Clarke is known for his development of a Thomistic personalism To be a person according to Saint Thomas is to take conscious self possession of one s own being to be master of oneself But our incarnate mode of being human involves living in a body whose life unfolds across time and is inevitably dispersed across time If we wish to know fully who we are we need to assimilate and integrate this dispersal so that our lives become a coherent story In addition to the existentialist thought of Etienne Gilson and others Clarke draws on the Neoplatonic dimension of participation Existence as act and participation have been the central pillars of his metaphysical thought especially in its unique manifestation in the human person The essays collected here cover a wide range of philosophical ethical religious and aesthetic topics Through them sounds a very personal voice one that has inspired generations of students and scholars

**Christian Wholism** John B. Wong,2002 In this stimulating work Dr Wong propounds Christian Wholism as a path to peace and joy as well as healing for our brokenness and lostness in the postmodern world Wong discusses what it means to be whole in our spiritual intellectual physical ethical psychological and other domains of our multidimensional personhood Some practical suggestions are offered He voices a hope in God s promise of a resurrected body as the gift of ultimate wholeness

**Imagination and Fantasy in the Middle Ages and Early Modern Time** Albrecht Classen,2020-08-24 The notions of other peoples cultures and natural conditions have always been determined by the epistemology of imagination and fantasy providing much freedom and creativity and yet have also created much fear anxiety and horror In this regard the pre modern world demonstrates striking parallels with our own insofar as the projections of alterity might be different by degrees but they are fundamentally the same by content Dreams illusions projections concepts hopes utopias dystopias desires and emotional attachments are as specific and impactful as the physical environment This volume thus sheds important light on the various lenses used by people in the Middle Ages and the early modern age as to how they came to terms with their perceptions images and notions Previous scholarship focused heavily on the history of mentality and history of emotions whereas here the history of pre modern imagination and fantasy assumes center position Imaginary things are taken seriously because medieval and early modern writers and artists clearly reveal their great significance in their works and their daily lives This approach facilitates a new deep structure analysis of pre modern culture
