Investigating the Use of Sex in Media Promotion and Advertising Tom Reichert, 2019-01-15 The latest scholarship on one of today's most pressing issues. Today it is obvious that sexual content is a prevalent aspect of the media and that the intensity of this content has increased in recent years. Less obvious, however, are the direct effects the strategic use of sexual content has on audiences. *Investigating the Use of Sex in Media Promotion and Advertising* presents the latest scholarship on the role of sex in the most common media outlets: television programming, radio, shock jocks, music videos, magazines, and advertising. The eye-opening contributions from over a dozen recognized experts in the field provide useful empirical evidence on media conveyed sexual stimuli and look toward moving the public dialogue on sex in the media further along. Often opinions regarding sex in the media have little or no scientific grounding, and even when scientifically grounded arguments are offered, they suffer from wide gaps in research-based knowledge. *Investigating the Use of Sex in Media Promotion and Advertising* is the important compilation that fills these knowledge gaps. In delving into this pressing issue, it not only offers timely findings that provide an indication of the nature, prevalence, and effects of sexual information when used as a promotional tool, but suggests new directions for the study of sex and media as well. This informative text is also extensively referenced and features numerous tables to clearly present research data. Chapters in *Investigating the Use of Sex in Media Promotion and Advertising* examine the nature and extent of sexually appealing newscasters, primarily on cable news programs; commentary and camera angles of women's sporting events in the 2004 Summer Olympic Games; the efficacy of both sexual content and sexual self-schema on consumers' attitudes toward promotional announcements, advertised programs, viewing intention, and self-reported arousal; the history and content analysis of shock jock radio, like the Howard Stern and the Bob Tom shows; the relationship among sexual content in music videos, viewer enjoyment, and actual product purchase intention; Maxim magazine's cover formula and the competitive response from other men's lifestyle magazines; the efficacy of men's magazines' sexual cover models on consumer outcome variables, including interest and purchase intention; an international perspective of nudity in advertising in magazines versus on television; a case study of the sexual appeals used in several billboard ads for the Hard Rock Hotel and Casino in Las Vegas; and much more. Filled with insightful and groundbreaking information, *Investigating the Use of Sex in Media Promotion and Advertising* is a vital resource for advertising and media professionals, as well as educators and upper-level and graduate students in media communications and advertising programs.

Body Shots Emily Fox-Kales, 2011-04-01 How do movie star bodies and celebrity culture influence the way real girls and women feel about their own size and shape? What effect can popular films have on everyday eating behavior and exercise rituals? *Body Shots* shows how Hollywood films, movie stars, and celebrity media help propagate the values of an eating-disordered culture that promotes constant self-scrutiny and vigilance, denial of appetite, and overcontrol of weight in the compulsive pursuit of an eternally elusive body ideal of slenderness and fitness. In a unique

approach that merges the disciplines of film analysis gender studies and psychology clinical psychologist and cinema studies scholar Emily Fox Kales demonstrates how the body narratives of such Hollywood celebrities as Lindsay Lohan Gwyneth Paltrow and Oprah Winfrey and their battles with bulimia post maternal weight gain and yo yo dieting not only serve as public enactments of the same eating and weight struggles their fans endure but create a new normal which naturalizes and even valorizes the chronic body dissatisfaction and weight obsession that are established risk factors for eating disorders in women and girls Written for students of cultural and gender studies parents media literacy educators as well as film buffs everywhere this book aims to provide the moviegoer with the critical tools necessary to develop a resistant gaze at Hollywood productions and make healthier choices among the many viewing screens of our super mediated world
