## Corba Networking With Java:

*Corba Networking with Java* George M. Doss, 1999 CORBA Networking with Java is a practical hands on approach for network administrators who want to know the day to day pitfalls and problems of integrating a CORBA network with Java The CD ROM contains an Intranet fundamentals course *Strategic Production Networks* Li Zheng, Frank Pospel-Dölken, 2013-06-05 Implementing co operative production networks is a major strategic target of many small and medium sized enterprises to secure and foster future competitiveness on the global market Beginning with the strategic management and going down to the operational product development and operations execution this book gives a detailed overview of the different key issues of setting up strategic production networks Management concepts the required information technology as well as best practices are introduced and discussed by leading researchers from Germany Switzerland and China The book aims at supporting managers responsible for setting up global or regional co operative production networks as well as researchers and students working on this matter *Integrated Network Management V* Aurel Lazar, Robert Saracco, 2013-06-05 Welcome to IM 97 We hope you had the opportunity to attend the Conference in beautiful San Diego If that was the case you will want to get back to these proceedings for further readings and reflections You will find e mail addresses of the main author of each paper and you are surely encouraged to get in touch for further discussions You can also take advantage of the CNOM Committee on Network Operation and Management web site where a virtual discussion agora has been set up for IM 97 URL <http://www.cselt.stet.it/CNOMWWWIIM97.html> At this site you will find a brief summary of discussions that took place in the various panels and slides that accompanied some of the presentations all courtesy of the participants If you have not been to the Conference leafing through these proceedings may give you food for thought Hopefully you will also be joining the virtual world on the web for discussions with authors and others who were at the Conference At IM 97 the two worlds of computer networks and telecommunications systems came together each proposing a view to management that stems from their own paradigms Each world made clear the need for end to end management and therefore each one stepped into the other's field We feel that there is no winner but a mutual enrichment The time is ripe for integration and it is likely that the next Conference will bear its fruit **An Introduction to Network Programming with Java** Jan Graba, 2003 With the explosion in growth of the internet and the increasing use of intranets across a wide spectrum of business areas there has been a correspondingly large growth of interest in network programming particularly in the use of client server applications Java's inbuilt network programming capabilities and its platform independence have made it a natural choice for network applications and it has quite rightly been referred to as the language of the internet Exceptionally difficult and fraught with pitfalls in most languages the programming of network applications is greatly eased by the use of Java libraries An Introduction to Network Programming using Java is a streamlined text that provides clear guidance on all essential aspects of network programming that might be expected to appear on the

syllabus of an undergraduate module in this area Areas covered include file handling JDBC servlets JavaBeans and Java Server Pages
