Refractive Surgery J. Bradley Randleman, 2024-06-01 Refractive Surgery An Interactive Case Based Approach presents all of the necessary refractive surgery material to make an informed decision regarding diagnosis and management plans Rather than utilizing the standard organization of most books where major points are first introduced and then explained through a series of writings and references this book relies on the clinical decision making process involved with treating refractive surgery patients Refractive Surgery An Interactive Case Based Approach by Dr J Bradley Randleman builds upon foundational initial chapters through the case presentations and focused case discussions encompassing the major topics in refractive surgery today For each case the critical question is simply what data in this chart is the most critical to consider when evaluating this patient for surgery Refractive Surgery An Interactive Case Based Approach is unique in its format Specifically the book facilitates active learning by forcing the reader to think through a series of questions surrounding each patient scenario This active learning not only facilitates better recall of the information presented but also mimics the actual physician to patient clinical experience making this book more relevant than other routine refractive surgery books Bonus This dynamic learning tool is also supplemented by interactive online video material to further the learning experience Enhance the clinical decision making process by watching the videos and then answering a series of questions that lead to the conclusion of each scenario By challenging the reader to perform the thinking and decision making up front and then providing some guidance on the most salient concepts for each case scenario presented along with resources to gain a deeper understanding of the most complex concepts Refractive Surgery An Interactive Case Based Approach engages more in the learning process and thereby allowing to absorb and retain significantly more information to apply to patient care and the education of others Ophthalmologists residents fellows resident and fellowship educators who want to update their refractive surgery knowledge base will appreciate the unique format and style of Refractive Surgery An Interactive Case Based Approach

Session,1998 Preface From Friday morning February 21 1997 through Sunday February 23 at noon members and guests of the New Orleans Academy of Ophthalmology heard presentations and discussions of the latest techniques and trends in the

study of corneal diseases and surgery including refractive surgery This was the subject of the Forty Sixth Annual Symposium of the Academy The speakers comprised a group of eight clinician surgeons with a wealth of experience and a well respected talent for innovation in their areas of expertise From trends in bacterial keratitis to ocular surface disease and healing to the latest opinions on anterior segment reconstruction and refractive surgery the topics covered were diverse and timely Especially interesting were the discussions generated by the panelists presentations and by the question and answer sessions The demands placed on the speakers at the Annual Meeting of the New Orleans Academy of Ophthalmology are large and multiple and probably greater than for most other educational conferences Each speaker commits to preparing several lectures and usually a panel discussion for presentation and all speakers are asked to participate in the panel discussions and question and answer periods The topics are chosen by the program committee and we sometimes ask speakers to present a subject that is not in their area of research or primary interest This usually means researching and preparing a completely new lecture And last but not least all speakers commit to preparing chapters and completing panel discussions for this book And these duties are added to already busy practice and speaking schedules in fact the speakers are selected because they have new ideas and useful things to say that everyone wishes to hear Not all invited speakers are up to the task but this year we were fortunate that all of our first choices accepted the challenge Because of the rapidity of change in both refractive surgery and anterior segment treatment we have attempted to provide the transactions as rapidly as possible This urgency has again added more demands on the time and energy of the speakers And this group of authors has responded admirably to our requests Because of their efforts the reader can use this publication as an update and as a gauge to his her present practice guidelines I wish to thank all eight speaker authors for their efforts on behalf of the New Orleans Academy of Ophthalmology and the readers of this publication The information presented here was put on paper by the authors but we readers are the ones who benefit In addition they have added to a forty year tradition of publications by the New Orleans Academy of Ophthalmology I hope that readers consider this book as timely and as useful as previous issues of the Transactions I also wish to thank Monica L Monica MD President of the NOAO and the Executive Committee for supporting the program and this publication As always a considerable amount of time and effort came from Emily Busby executive secretary of the NOAO and my thanks go to her as well Lastly Marguerite McDonald MD deserves much credit in the organization of the meeting and the program Her knowledge and experience were truly indispensable Daniel A Long MD
