**Cornish Seines and Seiners** Cyril Noall,1972      The Unnatural History of the Sea Callum Roberts,2007-07-14

Humanity can make short work of the oceans creatures In 1741 hungry explorers discovered herds of Steller s sea cow in the Bering Strait and in less than thirty years the amiable beast had been harpooned into extinction It s a classic story but a key fact is often omitted Bering Island was the last redoubt of a species that had been decimated by hunting and habitat loss years before the explorers set sail As Callum M Roberts reveals in *The Unnatural History of the Sea* the oceans bounty didn t disappear overnight While today s fishing industry is ruthlessly efficient intense exploitation began not in the modern era or even with the dawn of industrialization but in the eleventh century in medieval Europe Roberts explores this long and colorful history of commercial fishing taking readers around the world and through the centuries to witness the transformation of the seas Drawing on firsthand accounts of early explorers pirates merchants fishers and travelers the book recreates the oceans of the past waters teeming with whales sea lions sea otters turtles and giant fish The abundance of marine life described by fifteenth century seafarers is almost unimaginable today but Roberts both brings it alive and artfully traces its depletion Collapsing fisheries he shows are simply the latest chapter in a long history of unfettered commercialization of the seas The story does not end with an empty ocean Instead Roberts describes how we might restore the splendor and prosperity of the seas through smarter management of our resources and some simple restraint From the coasts of Florida to New Zealand marine reserves have fostered spectacular recovery of plants and animals to levels not seen in a century They prove that history need not repeat itself we can leave the oceans richer than we found them      *The Cornish Fishing Industry* John McWilliams,2014-05-15 Mining and Fishing have been the staple industries of Cornwall for two millennia John McWilliams looks at the rise and decline of Cornish fishing in this new history      *Inshore Craft* Basil Greenhill,Julian Mannering,2013-04-15 This comprehensive reference work describes and illustrates some 200 types of inshore craft that once fished and traded under oar and sail around the coasts of the British Isles The types are arranged by coastal area and each is described in terms of its shape and design fitness for location and purpose build evolution and geographical distribution Details of dimensions rig building materials seamanship and the survival of examples are given where known while hundreds of line drawings and photographs show the vessels in their original forms A team of twelve experts describe all these boat types and in addition there are introductions to the main geographic areas outlining the physical environments fisheries and other uses of the sea that have influenced boat design maps of all the areas show ports and physical features At the beginning of the last century sail and oar dominated fisheries and local trade one hundred years later those craft have all but vanished This book brings alive for maritime historians and enthusiasts traditional boat sailors modelmakers and all those with an interest in local history the vast array of craft that were once such a significant feature of our inshore seas *Inshore Craft* is a spectacular achievement *Wooden Boat Magazine*      *Sustaining the Fleet, 1793-1815*

Roger Knight, Martin Howard Wilcox, 2010 An assessment of the work of the contractors who were commissioned by the Victualling Board to provision the fleet in this period Provisioning the fleet and the army overseas during the French Wars of 1793-1815 was a major undertaking This book explains how the Victualling Board in London handled this enormous task focusing in particular on contractors that is the merchants and brokers who provided a vast range of commodities including flour and biscuit salt beef and pork as well as huge quantities of fresh water and coal and every other item needed It shows how these merchants could be large or small concerns and provides detailed case studies of different kinds of contractors including examples of contractors based both in Britain and in the navy's overseas bases The book demonstrates how overall the contracting system represented the mobilisation of a substantial part of the British economy for war how the performance of contracting was effective with little or no corruption and how the contractors took considerable financial risks and made only reasonable margins It assesses the performance of the Victualling Board arguing that this was good and that the problem in the major area of weakness accounting was quickly addressed following a major crisis in 1808-09 It concludes that this was an impressive performance by the state but that the overwhelming advantage was the resilience of the market and that it was upon the success of the contractors that the war at sea was won For most of his career ROGER KNIGHT was on the staff of the National Maritime Museum leaving as Deputy Director in 2000 Since then he has taught at the Greenwich Maritime Institute at the University of Greenwich where he is currently Visiting Professor of Naval History MARTIN WILCOX completed a doctorate in maritime history at the University of Hull and has been employed as postdoctoral research fellow at Greenwich Maritime Institute since 2006

**Sardine** Trevor Day, 2018-09-15 The sardine is a paradoxical fish. Seemingly insignificant it has made fortunes for some and when stocks have collapsed caused hardship for many its status shifting from utilitarian food to gourmand's delight. And in this book Trevor Day diver fish watcher and marine conservationist travels across four continents to meet the sardine in both its natural and cultural environment. Tracing the fish's journey from minuscule egg to dinner plate Day interweaves the story of the sardine with the rise and fall of entire fisheries. A wide ranging look at the cluster of fish species called sardines Day's book explores their relationship both with other marine creatures and with us. Elite predators feast on sardines yet these silvery slivers are fast breeding and opportunistic enough to likely survive their hunters for many millennia to come. Whether swimming free as a shoaling fish at the mercy of predators packed in tins and as a metaphor for overcrowding or grilled on the streets of Lisbon as part of the Feast of St Anthony sardines have come to represent conformity vulnerability and tradition. And as Day's biography of this familiar but under appreciated fish reveals the sardine is a barometer for the health of our oceans a fish with lessons for us all about our stewardship of the seas Richard von Cornwall seit seiner Wahl zum deutschen König Johannes Ferdinand
