Fibroids are simple non-cancerous growth of uterine cells which get worse with age. Every journey of the female patient is full of twists & turns, and silence over the issues further complicates the matter. One such problem is uterine fibroids. It is commonly encountered, making it practically important to know the basics of this problem.

Uterine fibroids are lumps or tumours that develop within the uterine walls of women. Although they are the most common tumours of the female genital tract, they are, thankfully, almost always benign.
