Education for All Kōichirō Matsuura,Unesco,2004 In 2000 at the World Education Forum over 160 countries committed

themselves to six Education for All EFA goals to expand basic educational opportunities for all by 2015 as part of the international community's strategy to reduce global poverty levels. This report focuses on the factors which determine the quality of education including financial and material resources for schools, staffing resources and training core subjects and leadership issues. It includes case studies from a number of countries to show how both rich and developing nations are addressing the quality issue and finds that progress so far is insufficient in several regions of the world to meet the EFA targets. The report goes on to map out key policies for improving the teaching and learning process especially in low income countries.

Core Competencies for Psychiatric Education Linda Boerger Andrews, John William Burruss, 2004. The Accreditation Council for Graduate Medical Education endorsed six General and five Psychiatric Competencies to be attained by psychiatric residents. As a result these General Patient Care, Medical Knowledge, Practice Based Learning and Improvement, Interpersonal and Communication Skills, Professionalism and Systems Based Practice and Psychiatric Brief Therapy, Cognitive Behavioral Therapy, Psychodynamic Psychotherapy, Psychotherapy Combined With Psychopharmacology and Supportive Therapy Competencies are now being phased in for all core residency training programs in the United States. This volume, coauthored by the director and the associate director of general psychiatric residency education at Baylor College of Medicine, is a practical guide for educators working to incorporate the Competencies into their residency programs. It will help training directors and others involved in designing and implementing residency programs to ensure that residents develop all of the Competencies to the level expected of a new practitioner as required by ACGME. The book lists the specific knowledge, skills and attitudes that must be taught for each of the Competencies and provides example components for each. These lists were developed by various groups of experts. Describes techniques for effectively providing feedback to residents. Chapter titles include How Residents Learn and Develop Competence and How to Assess Learning and Competence. Includes example goals and objectives for didactic courses and rotations as well as ACGME's Toolbox of Assessment Methods. Offers handy to-do lists for the program director, rotation coordinator and course director as well as an appendix section that contains forms for verifying resident experience, evaluating psychotherapy supervision, conducting semiannual evaluations and evaluating residents' progress. *Core Competencies for Psychiatric Education* is an indispensable guide for anyone trying to learn how best to teach and assess competency based psychiatric curricula.
