

Intelligent Spacing displays indicators when an object is equidistant between two other objects (left) or has the same spacing as the closest onscreen objects (right).

New! Guidelines docker

With the new **Guidelines** docker in both CorelDRAW X7 and Corel PHOTO-PAINT X7, it's never been easier to add, manage, and modify guidelines. You can position guidelines with precision by using x and y coordinates, alter the line style and color, set objects and editable areas to snap to guidelines, and lock guidelines to avoid accidental changes. Plus, you can set up angled guidelines and specify their angle of rotation. For more information, see "Setting up guidelines" on page 454.

New! Alignment Guides

The new alignment guides in Corel PHOTO-PAINT X7 help you position objects more quickly, appearing on the fly with suggested alignments to other nearby objects. You can use the new **Alignment guides** docker to view, set up, and modify alignment guides. And with new margin alignment guides, you can now specify inset and offset values when aligning an object relative to another object.

New! QR codes

With CorelDRAW X7, you can now create unique, artistic, and scalable QR codes by adding text, colors, and images. Popular in consumer advertising and packaging, QR codes give smartphone users quick access to a brand's website which can offer additional product information. The **Object properties** docker makes it easy to customize a QR code, and you can create a style that saves a fixed appearance for the QR code to enable quick and easy reuse.

You can change the shape, outline width, color, and fill type of the QR code pixels, change the background color and fill type, and more. You can also choose which information to include in the QR code, such as URL, email address, phone number, SMS, Contact, Calendar event, and Geo location. There's also a **Validate** option, which analyzes the QR code to ensure it can be read by QR code readers, smartphones, and scanners.

For more information, see "Inserting and editing QR codes" on page 219.

New! Smoothing objects

CorelDRAW X7 provides a new **Smooth** tool that you can use to remove jagged edges and reduce nodes in curve objects. You can control the smoothing effect by varying the size of the brush nib, the speed at which the effect is applied, and by using the pressure of your digital pen or stylus. For more information, see "Smoothing objects" on page 150.

New! Special effects

Corel PHOTO-PAINT X7 introduces new camera effects, such as Bokeh blur, Colorize, Sepia Toning, and Time Machine to help you recreate historic photographic styles and give your images unique visual appearances.

With the Bokeh blur effect, you can define an area of focus and leave the rest of the image out of focus. You can create a duotone image by using the Colorize effect to replace all colors in an image with a single hue. The Sepia Toning effect simulates a photo taken with sepia film, which is similar to grayscale except with brown tones. And with the Time Machine, you can choose from seven historic photography styles ranging from 1839 to the 1960s.
