Correct Hardware Design Methodologies:

Correct Hardware Design Methodologies Paolo Prinetto, Paolo Camurati, 1992 The increasing interest in formal verification of hardware is witnessed by academic and industrial research efforts multinational research projects and conferences These proceedings contain the papers presented at the Workshop held in Turin Italy from 12-14 June 1991 Papers focus on the practical impact of formal techniques in VLSI design and verification semantics for hardware description languages proof environments and methodologies Preliminary results of the ESPRIT Basic Research Action 3216 CHARME are discussed Finite State Machines and their verification semantics for hardware description languages proof environments and methodologies as well as examples of verified circuits and Design for Verifiability are also presented Correct Hardware Design and Verification Methods George J. Milne, Laurence Pierre, 1993-05-12 These proceedings contain the papers presented at the Advanced Research Working Conference on Correct Hardware Design Methodologies held in Arles France in May 1993 and organized by the ESPRIT Working Group 6018 CHARME 2 and the Universit de Provence Marseille in cooperation with IFIP Working Group 10.2 Formal verification is emerging as a plausible alternative to exhaustive simulation for establishing correct digital hardware designs The validation of functional and timing behavior is a major bottleneck in current VLSI design systems slowing the arrival of products in the marketplace with its associated increase in cost From being a predominantly academic area of study until a few years ago formal design and verification techniques are now beginning to migrate into industrial use As we are now witnessing an increase in activity in this area in both academia and industry the aim of this working conference was to bring together researchers and users from both communities

Melham, 2001-08-27 This book constitutes the refereed proceedings of the 11th IFIP WG 10.5 Advanced Research Working Conference on Correct Hardware Design and Verification Methods CHARME 2001 held in Livingston Scotland UK in September 2001 The 28 revised full papers and eight short papers presented together with two invited papers and one special paper were carefully reviewed and selected from 56 submissions The book offers topical sections on model checking clocking issues theorem proving with higher order logics hardware compilation tools component verification case studies algorithm verification and duration calculus

Correct Hardware Design and Verification Methods Laurence Pierre, Thomas Kropf, 1999-09-15 CHARME 99 is the tenth in a series of working conferences devoted to the development and use of leading edge formal techniques and tools for the design and verification of hardware and systems Previous conferences have been held in Darmstadt 1984 Edinburgh 1985 Grenoble 1986 Glasgow 1988 Leuven 1989 Torino 1991 Arles 1993 Frankfurt 1995 and Montreal 1997 This workshop and conference series has been organized in cooperation with IFIP WG 10.5 It is now the biannual counterpart of FMCAD which takes place every even numbered year in the USA The 1999 event took place in Bad Herrenalb a resort village located in the Black Forest close to the city of Karlsruhe The validation of functional and timing behavior is a major

bottleneck in current VLSI design systems A predominantly academic area of study until a few years ago formal design and verification techniques are now migrating into industrial use The aim of CHARME 99 is to bring together researchers and users from academia and industry working in this active area of research Two invited talks illustrate major current trends the presentation by Gerard Berry Ecole des Mines de Paris Sophia Antipolis France is concerned with the use of synchronous languages in circuit design and the talk given by Peter Jansen BMW Munich Germany demonstrates an application of formal methods in an industrial environment The program also includes 20 regular presentations and 12 short presentations poster exhibitions that have been selected from the 48 submitted papers

Fundamentals and Standards in Hardware

Description Languages Jean Mermet,2012-12-06 The second half of this century will remain as the era of proliferation of electronic computers They did exist before but they were mechanical During next century they may perform other mutations to become optical or molecular or even biological Actually all these aspects are only fancy dresses put on mathematical machines This was always recognized to be true in the domain of software where machine or high level languages are more or less rigorous but immaterial variations of the universally accepted mathematical language aimed at specifying elementary operations functions algorithms and processes But even a mathematical machine needs a physical support and this is what hardware is all about The invention of hardware description languages HDL s in the early 60 s was an attempt to stay longer at an abstract level in the design process and to push the stage of physical implementation up to the moment when no more technology independent decisions can be taken It was also an answer to the continuous exponential growth of complexity of systems to be designed This problem is common to hardware and software and may explain why the syntax of hardware description languages has followed with a reasonable delay of ten years the evolution of the programming languages at the end of the 60 s they were Algol like a decade later Pascal like and now they are C or ADA like They have also integrated the new concepts of advanced software specification languages
