Defining British Citizenship Empire Commonwealth And Modern Britain:

Defining British Citizenship Rieko Karatani, 2003 This book explains the immigration and citizenship policies in Britain that repeatedly postponed the creation of British citizenship until 1981 It examines the alternative citizenships of British subjecthood and Commonwealth citizenship and demonstrates how the complex rules of citizenship and immigration were devised in response to the need to build and transform those global institutions the British empire and later the Commonwealth In covering these areas this work extends the research beyond this century It argues that Britain's formal membership has always been attached to the global institution and that the creation of British citizenship was rejected as long as policy makers in Britain considered it beneficial to maintain the global institution in some form In addition to the division between the holders and non holders of British subjecthood there was a future division among British subjects those in Britain and the Dominions were regarded as kith and kin whereas those in the colonies only had the same nominal status The affinity between those in Britain and the Dominions was institutionalised in 1914 by the common code system whereby Dominion governments were to adopt identical citizenship legislation Post Second World War immigration policy was in practice a continuation of pre war policy with an all embracing citizenship law alongside exclusive immigration controls The enactment of the British Nationality Act 1981 was a belated acknowledgement by the British government that its long standing efforts to maintain the citizenship structure that enabled the alternative and national types of citizenship to co exist had been abandoned by the Immigration Act 1971

UK Borderscapes Kahina Le Louvier, Karen Latricia Hough, 2023-09-04 This book analyses bordering practices and their negative effects as well as the many creative and often grassroots ways in which borders are resisted and reinvented From the hostile environment to Brexit and the Nationality and Borders Bill the UK border regime has become increasingly strict and complex operating both at the edge of the state and within everyday life in unprecedented ways At the same time this securitisation approach is often contested and its effects are fought daily by many groups and individuals This book explores this tension documenting and analysing how the contemporary UK border is imagined constructed deconstructed and reconstructed in multiple ways To draw together the different pieces that compose this evolving and conflicting landscape this book uses the concept of borderscapes which views borders as sites of multiple tensions between hegemonic non hegemonic and counter hegemonic imaginaries and practices This lens enables contributors to draw a multifocal overview of the UK border that includes the different human and material actors that form it the spaces and practices they shape and the imaginaries and counter imaginaries that emerge from their conflictual encounters Bringing together contributions by researchers from a variety of disciplines this book will be of interest to scholars and students in the fields of migration and border studies refugee studies human geography criminology sociology and anthropology

Citizenship in Africa Bronwen Manby, 2018-11-29 Citizenship in Africa provides a comprehensive exploration of nationality laws in Africa placing them in their theoretical and historical context It offers the first serious attempt to analyse the impact of nationality law on politics and society in different African states from a trans continental comparative perspective Taking a four part approach Parts I

and II set the book within the framework of existing scholarship on citizenship from both sociological and legal perspectives and examine the history of nationality laws in Africa from the colonial period to the present day Part III considers case studies which illustrate the application and misapplication of the law in practice and the relationship of legal and political developments in each country Finally Part IV explores the impact of the law on politics and its relevance for questions of identity and belonging today concluding with a set of issues for further research Ambitious in scope and compelling in analysis this is an important new work on citizenship in Africa

Running the Family Firm Laura Clancy, 2021-09-28 In recent decades the global wealth of the rich has soared to leave huge chasms of wealth inequality This book argues that we cannot talk about inequalities in Britain today without talking about the monarchy Running the Family Firm explores the postwar British monarchy in order to understand its economic political social and cultural functions Although the monarchy is usually positioned as a backward looking archaic institution and an irrelevant anachronism to corporate forms of wealth and power the relationship between monarchy and capitalism is as old as capitalism itself This book frames the monarchy as the gold standard corporation The Firm Using a set of case studies the Queen Prince Charles Prince Harry Kate Middleton and Meghan Markle it contends that The Firm's power is disguised through careful stage management of media representations of the royal family In so doing it extends conventional understandings of what monarchy is and why it matters

Legal Mobilization for Migrant Rights Virginia Passalacqua, 2025-05-07 The European Court of Justice plays a key role in the interpretation and enforcement of EU law Yet we still know little about the conditions under which cases arrive at the Court via preliminary reference and why they are so unevenly distributed across the EU Member States Previous studies have shown how the legal elites played a central role in feeding the Court with cases to increase their power and influence Legal Mobilization for Migrant Rights tells a different story Focusing on the migration domain this book shows that EU litigation can also be used to defend powerless groups To explore the conditions under which EU legal mobilization for migrants emerges the author compares three countries where EU migration law was mobilized before the European Court of Justice Italy the UK and the Netherlands and one where it was not Greece Combining empirical and doctrinal methods this volume draws on interviews with key stakeholders and an original database of 505 migration preliminary references Rather than focusing only on courts Legal Mobilization for Migrant Rights sheds light on the role of lawyers academics and civil society in activating EU justice to oppose restrictive national migration policies Crucially the book ultimately reveals that EU legal mobilization struggles to emerge in some contexts due to a lack of resources and limited awareness of EU legal opportunities which stand as significant obstacles to justice and migrant rights enforcement
