Subject Guide to Books in Print ,1997      Medical and Health Care Books and Serials in Print ,1997      **Scientific and Technical Books and Serials in Print** ,1989      Frontiers in Surface Science and Interface Science C.B. Duke,E. Ward Plummer,2002-05-21 Any notion that surface science is all about semiconductors and coatings is laid to rest by this encyclopedic publication Bioengineered interfaces in medicine interstellar dust DNA computation conducting polymers the surfaces of atomic nuclei all are brought up to date Frontiers in Surface and Interface Science a milestone publication deserving a wide readership It combines a sweeping expert survey of research today with an educated look into the future It is a future that embraces surface phenomena on scales from the subatomic to the galactic as well as traditional topics like semiconductor design catalysis and surface processing modeling and characterization And great efforts have been made to express sophisticated ideas in an attractive and accessible way Nanotechnology surfaces for DNA computation polymer based electronics soft surfaces interstellar surface chemistry all feature in this comprehensive collection      **Industrial Applications of Soil Microbes: Volume 4** Shampi Jain,Ashutosh Gupta,Neeraj Verma,2024-11-22 Industrial Applications of Soil Microbes is a compilation of reviews on the industrial usage of soil microorganisms Readers will be updated about recent applications of soil bacteria fungi and viruses in sectors such as agriculture biotechnology environmental management Volume 4 includes review on mycorrhizal fungi endophytes and a range of microbial chemicals and processes beneficial at industrial scale The 19 chapters start with an overview of mycorrhizae as biofertilizers their symbiosis with plants and their applications in improving crop yield stress management and soil health Case studies on *Lycopersicon esculentum* highlight practical benefits Soil microbes endophytes and microbial proteases are discussed for their role in biocontrol disease management and crop improvement The volume also explores eco friendly nematicides viruses in temperate fruit crops mushrooms nutritional value and metagenomics for bioinoculants Overall the volume emphasizes sustainable practices and future prospects involving microbes and microbe assisted processes      **Bio-Based Materials as Applicable, Accessible, and Affordable Healthcare Solutions** Adam A. Tracy,Sujata K. Bhatia,Krish W. Ramadurai,2018-01-03 In this book Nigeria the most populous country in Africa and a region in the lowest income group per capita is used to demonstrate the potential for healthcare reorganization and collaboration with the introduction of successful technologies centered around available bio compatible and sustainable natural resources Our book discusses three of the top killers of children under 5 years of age in Nigeria pneumonia 20% diarrheal diseases 15% and traumatic injuries 4% These conditions are used as examples to demonstrate the potential for improved pediatric outcomes with treatments engineered from sustainable and natural resources Furthermore this book outlines possible action items that can help drive economic growth educational opportunities collaborative outreach and workforce productivity to build a healthy and sustainable community Medical technology in the industrialized world has seen rapid advancements leading to increased survival and greater patient

outcomes However the development and implementation of these resources is not always applicable to regions in need of new and more basic ways to provide treatment Moore s Law a paradigm that considers advancement synonymous with increased digitization and optimization of electronic processes defines the history of technology However the functionality of advanced and smart technology is essentially useless in underdeveloped areas These regions lack some of the basic requirements for innovative medical technologies to impact human health such as electricity access to spare parts computer analysis tools and network architecture In addition the poor physical infrastructure insufficient management and lack of technical culture are barriers for entry and sustainability of these technologies Rather than importing medical devices from industrialized countries we propose that the mindset and research focus for under developed areas must be on successful technologies Simply put these areas need technology that gets the job done
