Deixis In Narrative

Richard Bailey

Deixis In Narrative:

Deixis in Narrative Judith F. Duchan, Gail A. Bruder, Lynne E. Hewitt, 2012-12-06 This volume describes the theoretical and empirical results of a seven year collaborative effort of cognitive scientists to develop a computational model for narrative understanding. Disciplines represented include artificial intelligence, cognitive psychology, communicative disorders, education, English, geography, linguistics, and philosophy. The book argues for an organized representational system, a Deictic Center (DC) which is constructed by readers from language in a text combined with their world knowledge. As readers approach a new text, they need to gather and maintain information about who the participants are and where and when the events take place. This information plays a central role in understanding the narrative. The editors claim that readers maintain this information without explicit textual reminders by including it in their mental model of the story world. Because of the centrality of the temporal, spatial, and character information in narratives, they developed their notion of a DC as a crucial part of the reader's mental model of the narrative. The events that carry the temporal and spatial core of the narrative are linguistically and conceptually constrained according to certain principles that can be relatively well defined. A narrative obviously unfolds one word or one sentence at a time. This volume suggests that cognitively a narrative usually unfolds one place and time at a time. This spatio-temporal location functions as part of the DC of the narrative. It is the here and now of the reader's mind's eye in the world of the story. Organized into seven parts, this book describes the goal of the cognitive science project resulting in this volume, the methodological approaches taken, and the history of the collaborative effort. It provides a historical and theoretical background underlying the DC theory, including discussions of deixis in language and the nature of fiction. It goes on to outline the computational framework and how it is used to represent deixis in narrative and details the linguistic devices implicated in the DC theory. Other subjects covered include crosslinguistic indicators of subjectivity, psychological investigations of the use of deixis by children and adults as they process narratives, conversation direction, giving implications for emerging literacy, and a narrator's experience in writing a short story.

New Essays in Deixis, 2022-06-13 This volume presents some new work on deixis and in particular deixis in narrative and literature. Deixis has long held fascination for both philosophers and linguists alike, and increasingly it is seen as a fundamental element of discourse in works of a more literary, linguistic, or stylistic nature. The aim of this book has been to gather and present material on deixis which is often referred to but has hitherto not received the space it warrants. The collection will be of interest to anyone working in linguistics and literary studies. There are essays on deictic processing, non-egocentricity, deictic worlds, and the deictic categories. The more literary material focuses on modernist aesthetics, the poetic deictic persona, pronouns, and narrative voice, and the problematic deixis of Keats's Odes.

Deixis in Narrative Discourse Gisa Rauh, 1974
Journal of Narrative and Life History, 1995 **Harvard Studies in Classical Philology**, 1999 *Expressing the Same by the Different* Igor Dreer, 2007-09-15 This volume offers an alternative sign-oriented analysis of the distribution of the

French Indicative and Subjunctive It rejects both government and functions attributed to both moods and shows that the distribution of the Indicative and the Subjunctive is motivated by their invariant meanings The volume illustrates the close interaction between the Indicative and the Subjunctive as linguistic signs and signs of other grammatical systems contextually associated with the invariant meanings of both moods Special consideration is given to the use of the Indicative and the Subjunctive in texts of different styles and genres This volume also deals with the diachronic disfavoring of the Subjunctive and especially of the Imperfect Subjunctive that occurred from Old French to Contemporary French It is argued that this disfavoring was motivated by the narrowing of the invariant meaning of the Contemporary French Subjunctive All hypotheses are supported by contextualized examples and frequency counts

Tense, aspect and discourse structure

Jakob Egetenmeyer, Sarah Dessì Schmid, Martin G. Becker, 2024-09-23 Tense and aspect are crucial devices of sentence meaning They interact with Aktionsart but also with verb types and adverbs when indicating temporal relations and building temporal discourse structure On the discourse level they are co determined by narrative functions enhancing the complexity of their description The volume depicts this vast field It unites twelve contributions which elaborate on three thematic cores 1 the context sensitivity of tense and aspect and their relationships with neighbouring categories 2 their interaction with adverbs 3 their functioning in discourse The volume advances our knowledge of the matters at hand in different respects It discusses the onomasiological status of categories such temporality and aspectuality critically It addresses the functioning of tense in discourse from various angles A further focus is placed on the imperfective past tense aspect form its uses and meaning potentials Its analysis ranges from marking evidentiality to indicating perspectives The volume combines papers with various theoretical approaches and methodologies notably formally oriented linguistics and data driven accounts The multiplicity of subjects and methods may resonate beyond the field of Romance linguistics

Studies in Language, 2005

Descriptio Linguistica Hermann Bluhme, Göran Hammarström, 1987 *New Vistas in Grammar* Linda R. Waugh, Stephen Rudy, 1991-01-01 The papers in this volume reflect the renewed interest in the semantics of grammatical categories and the issues of invariance and variation in grammar In particular this collection presents the current understanding of invariance of grammar with respect to the synchronic and diachronic analyses of specific languages and as realized in work on typology and universals The book is divided into five sections The Question of Invariance Invariance and Grammatical Categories Grammar and Discourse Grammar and Pragmatics Typology and Universals
