Democracy Governance And Economic Performance Theory And Evidence:

Democracy, Governance, and Economic Performance Yi Feng, 2003 A theoretical and empirical examination of why political institutions and organizations matter in economic growth

Book Review Scott Gehlbach, 2004 *Democratic Governance and Economic Performance* Dino Falaschetti, 2009-06-02 Conventional wisdom warns that unaccountable political and business agents can enrich a few at the expense of many But logically extending this wisdom implies that associated principals voters consumers shareholders will favor themselves over the greater good when rules of the game instead create too much accountability Democratic Governance and Economic Performance rigorously develops this hypothesis and finds statistical evidence and case study illustrations that democratic institutions at various governance levels e.g. federal state corporation have facilitated opportunistic gains for electoral consumer and shareholder principals To be sure this conclusion does not dismiss the potential for democratic governance to productively reduce agency costs Rather it suggests that policy makers lawyers and managers can improve governance by weighing the agency benefits of increased accountability against the distributional costs of favoring principal stakeholders over more general economic opportunities Carefully considering the fundamentals that give rise to this tradeoff should interest students and scholars working at the intersection of social science and the law and can help professionals improve their own performance in policy legal and business settings

Democracy, Governance, and Growth Stephen F. Knack, 2003 Demonstrates the importance of governance and social institutions to economic performance

Democracy, Governance, and Economic Growth Francisco Rivera-Batiz, 2002 The paper examines how democracy affects long run growth by influencing the quality of governance Empirical evidence is first presented showing that measures of the quality of governance are substantially higher in more democratic countries A general equilibrium endogenous growth model is then built to show how a governance improving democracy raises growth In this model stronger democratic institutions influence governance by constraining the actions of corrupt officials Reducing corruption in turn stimulates technological change and spurs economic growth Empirical evidence is presented showing that democracy is in fact a significant determinant of total factor productivity TFP growth between 1960 and 1990 in a cross section of countries But this contribution occurs only insofar as stronger democratic institutions are associated with greater quality of governance

Coalition Politics and Economic Development Irfan Nooruddin, 2010-12-02 Coalition Politics and Economic Development challenges the conventional wisdom that coalition government hinders necessary policy reform in developing countries Irfan Nooruddin presents a fresh theory that institutionalized gridlock by reducing policy volatility and stabilizing investor expectations is actually good for economic growth Successful national economic performance he argues is the consequence of having the right configuration of national political institutions Countries in which leaders must compromise to form policy are better able to commit credibly to investors and therefore enjoy higher and more stable rates of economic development

Quantitative analysis of business

surveys and national economic data together with historical case studies of five countries provide evidence for these claims This is an original analysis of the relationship between political institutions and national economic performance in the developing world and will appeal to scholars and advanced students of political economy economic development and comparative politics

Breaking the Barriers to Higher Economic Growth Mustapha Kamel Nabli,2007-01-01 The world s attention to the countries of the Middle East and North Africa MENA region has often been dominated by headline issues conflict sanctions political turmoil and rising oil prices Little of this international attention has considered the broad range of development challenges facing this diverse group of countries Breaking the Barriers reflects the collected thinking of the World Bank s Office of the Chief Economist for the MENA Region on the long term development challenges facing the region and the reform priorities and strategies for effectively meeting these challenges It *Social Computing, Behavioral-Cultural Modeling and Prediction* William G. Institutions, Partisanship and Credibility in Global Financial Markets Hye Jee Cho,2017-07-28 Increasingly integrated global financial markets have been shaken by a series of severe shocks in recent decades from Mexico s Tequila crisis to the upheavals in the Eurozone These crises have demonstrated that signs of uncertain local economic and political conditions can result in market fluctuations which in turn cause economic social and political instability Such instability is particularly severe for developing countries that rely heavily on international financial markets for their financial needs Building credibility in these markets is therefore important for national governments who wish to prevent market panic and capital flight and ultimately to achieve stable economic growth Earlier studies have argued that institutional arrangements that constrain governments and commit them to protecting private property rights and market friendly policies can send a strong positive signal to the markets about a given country s sovereign credibility This book argues however that the market perception of such credibility building institutions is significantly contingent on which party governs the country Formal institutions confer significant credibility building effects on left wing governments whereas less or no significant effects are enjoyed by right wing governments And beyond that any significant changes in a country s institutional landscape such as a breakdown of democracy or joining an international organization that can influence domestic politics have particularly strong impact on the credibility of left wing governments This argument is supported by a quantitative analysis of sovereign credit

ratings data collected from around 90 developing countries from 1980 to 2007 by case studies from South Asia Eastern Europe and Latin America and by face to face interviews with 24 financial market experts based in Hong Kong Seoul and Paris

Democratic Governance Séverine Bellina, Hervé Magro, Violaine de Villemeur, France. Ministère des affaires étrangères et européennes, 2009 Governance has become a key word in the lexicon of international relations over the last twenty years It is used loosely and invariably in a liberal idiom by scholars activists civil society organizations politicians and the voluntary sector In many respects it has attained the status of a fetish yet governance remains a notion that has multiple definitions a concept in the making Notwithstanding the imprecision with which the term is employed it has become an inescapable paradigm for the politics of development The contributors to this book drawn from among some of the world's best area studies specialists from North and South offer a diverse global critique of governance as deployed in several key areas institutions and state actors the rule of law democracy and human rights decentralization and state power development and last but not least international cooperation and the role of the World Bank the IMF and NGOs The geographical spread of the volume ranges from Africa to Latin America from Asia to the Middle East Their objectives include a reassessment of governance in its many manifestations an attempt to free the term from its often unhelpful linkage to the state and thereby apply it to other organizations and actors a re-evaluation of the Western dominated use of the term politically and an attempt to broaden its application beyond issues such as transparency and the fight against corruption and a search for innovative applications of the term driven by a consensus that transcends current economic and political inequalities

World Development Report 2007 Emmanuel Jimenez,World Bank,2006

Developing countries which invest in better education healthcare and job training for their young people between the ages of 12 and 24 years of age could produce economic growth and sharply reduced poverty With 1.3 billion young people now living in the developing world the largest ever youth group in history the report says there has never been a better time to invest in youth because they are healthier and better educated than previous generations and they will join the workforce with fewer dependents because of changing demographics The report says that young people make up nearly half of the ranks of the world's unemployed and as for example in the Middle East and North Africa region must create 100 million jobs by 2020 in order to stabilize its employment situation Moreover surveys of young people in East Asia and Eastern Europe and Central Asia carried out as research for the report indicate that access to jobs along with physical security is their biggest concern Far too many young people some 130 million 15-24 year olds cannot read or write Secondary education and skill acquisition make sense only if primary schooling has been successful This is still far from being the case and efforts have to be reinforced in this area In addition more than 20 percent of firms in countries such as Algeria Bangladesh Brazil China Estonia and Zambia rate poor education and work skills among their workforce Overcoming this handicap starts with more and better investments in youth The report highlights three areas to promote better investment in the future expanding opportunities enhancing capabilities and providing second chances Expanding opportunities focuses on increasing the quality of education smoothing the transition to work and providing young people with a platform for civic engagement Enhancing capabilities involves making young people aware of the consequences of their actions especially consequences that will affect them much later in life as well as building their decision making skills and giving them the right incentives Providing second chances calls for helping young people recover from missed opportunities through remedial education retraining treatment and rehabilitation
