**Europe, Phenomenology, and Politics in Husserl and Patocka** Lorenzo Girardi, 2023-09-27 Europe is often discussed in the context of crisis usually economic or political Less prominent these days is Europe s spiritual crisis an important topic throughout the previous century Various catastrophes put in doubt the rationalist principles on which Europe had based itself The current relativist intellectual and political climate can still be seen as an expression of this Rather than following attempts to counter this via the restoration of a supposedly European essence often in terms of Christianity or rationalism this book attempts to think the crisis through to its end and to articulate the truth which manifests itself in it The themes of this book Europe phenomenology and politics share a concern with the crisis as the dissolution of the world that is the dissolution of a shared horizon of human existence Among phenomenologists Husserl and Patocka foremost have linked this problematic to reflections on the idea of Europe itself They represent two distinct perspectives corresponding to different historical situations Nonetheless what is presented here is not primarily the continuity between their thought and their historical circumstances but rather the underexamined continuity between their phenomenology and their thought on Europe and politics Applying phenomenology to politics Husserl s and Patocka s thought are used to assess the justification for and limits of liberal and agonistic political philosophy respectively By analysing the concrete ways in which our world is structured experientially the limits of the ideal of rational reconciliation are shown An alternative conception of politics is developed on the basis of the breakdown of Europe s rationalist ideal that is on the basis of the truth which manifests itself in Europe s crisis without lapsing into a relativism where anything goes This leads to an agonistic conception of liberal democracy based on Patocka s phenomenological concept of problematicity

Reflections on Rawls Shaun P. Young, 2016-04-08 The late John Rawls was one of the most inspiring provocative and influential political philosophers of the twentieth century In this collection a panel of distinguished political philosophers critically explore the intellectual legacy of Rawls The essays herein engage Rawls s political theorizing from his earliest published writings in the 1950s to his final publication in 2001 Justice as Fairness A Restatement and explore a diversity of issues related to his arguments such as the attractiveness of his methodology methodologies and the normative coherence and empirical validity of his claims In turn the effectiveness both of his arguments and those of various supporters and critics are evaluated from the perspective of a variety of analytical approaches including cosmopolitanism communitarianism perfectionism liberalism and legal theory This book is an edifying and engaging dialogue with ideas and arguments that have

provided the theoretical framework for much of contemporary political philosophy and a thoughtful assessment of their continuing significance and place within the pantheon of political philosophy

**Liberalism Without Perfection** Jonathan Quong, 2011 Liberalism without Perfection offers an introduction to the debate between liberal perfectionism and political liberalism This book is a new account and defence of Rawlsian political liberalism one of the most discussed but widely misunderstood and criticized theories in contemporary political theory

*Rawls and Habermas* Todd Hedrick, 2010-06-01 This book offers a comprehensive evaluation of the two preeminent post WWII political philosophers John Rawls and Jürgen Habermas Both men question how we can be free and autonomous under coercive law and how we might collectively use our reason to justify exercises of political power In pluralistic modern democracies citizens cannot be expected to agree about social norms on the basis of common allegiance to comprehensive metaphysical or religious doctrines concerning persons or society and both philosophers thus engage fundamental questions about how a normatively binding framework for the public use of reason might be possible and justifiable Hedrick explores the notion of reasonableness underwriting Rawls's political liberalism and the theory of communicative rationality that sustains Habermas's procedural conception of the democratic constitutional state His book challenges the Rawlsianism prevalent in the Anglo American world today while defending Habermas's often poorly understood theory as a superior alternative

[The State of Democracy in Latin America](#) Jonathan R. Barton, Laura Tedesco, 2004-11-04 The State of Democracy in Latin America critically examines the nature of the post transitional Latin American state with a more specific engagement with the cases of Argentina and Chile

**A Theoretical Examination of Political Values and Attitudes in New and Old Democracies** Matthew T. Kenney, 2003 This work examines the interplay between political values and the health and stability of liberal democracies It examines a set of core political values by drawing on the insights and arguments of leading political theorists past and present

**Towards a Competent Workforce** Bob Mansfield, Lindsay Mitchell, 1996 For over a decade the UK has been engaged in a radical reform of its vocational education and training This book contains the first comprehensive description of Functional Analysis the method developed to define occupational standards and National Vocational Qualifications It also discusses changes in contemporary work patterns arguing that a new model of occupational competence is needed the Job Competence Model The text is in four parts covering strategy models and methodologies and how to apply them in practice Both authors have both been closely associated with the methods and models described in the book and their personal insights add enormously to the value of the material

*Legislative Procedures and Lawmaking in Central America* Natalia Ajenjo, 2008 The book covers issues of constitutional design legislative procedures and agenda control four Central American cases in a comparative perspective The results relate to the critical view that presidential systems are inherently prone to institutional deadlock deriving from their rigid constitutional design My findings suggest that constitutional rules only determine broad parameters of variation and that greater attention should be paid to the endogenous procedural design of the legislative process of

decision making in the explanation of institutional performance and inter branch dynamics The work is comparative and bridges quantitative and qualitative analysis The data employed are original of lawmaking in one legislative term for the four cases under analysis A final set of normative reflections includes ideas on the relevance of understanding constitutional choice The theoretical substantive and methodological implications of the findings are thus reinserted into a normative view on procedural justice and the quality of democracy *Symposium - Société Canadienne Pour L'herméneutique Et la Pensée Postmoderne* ,2003

**From Ideologies to Public Philosophies** Paul Schumaker,Will Delehanty,2008-01-14 From Ideologies to Public Philosophies An Introduction to Political Theory provides a comprehensive and systematic account of the major ideologies of the 19th and 20th centuries along with contemporary and emerging outlooks to address the essential questions of political theory Explores the major ideologies of the 19th and 20th centuries while making clear distinctions for the reader between often confused interpretations of ideologies Engaging reader friendly style will appeal to students and facilitate sophisticated discussions Develops and defends pluralism as a broad public policy that is accepted by diverse political groups Supported by a glossary of terms suggestions for further reading and other helpful student and instructor resources at [www.blackwellpublishing.com/schumaker](http://www.blackwellpublishing.com/schumaker) *Liberalism and Modern Society* Richard Paul Bellamy,1992 This major new book is a wide ranging analysis of the emergence and development of liberalism from the mid nineteenth century to the present Bellamy examines the evolution of liberal ideas in Britain France Germany and Italy discussing the work of Mill Green Durkeim Weber and Pareto among others He situates their theories firmly within their respective historical contexts illustrating in this way the contingency of many of the social and moral assumptions underlying liberal thought For modern societies have undergone profound changes in the course of the last century and Bellamy argues that these changes have severely undermined many of the key tenets of liberalism The final part of the book examines critically the elaboration of liberal ideas in the work of contemporary political philosophers such as Hayek Nozick and Rawls Bellamy shows how the liberalisms of these writers rest on social views and moral intuitions that are now anachronistic and untenable He maintains that only a democratic liberalism built on realistic foundations can provide a plausible political theory in the complex and pluralist societies of the modern world *Critical Issues in Education* Jack L. Nelson,Stuart B. Palonsky,Kenneth Carlson,Mary Rose McCarthy (Ph. D.),2004 Designed to be used in courses that examine relevant pro and con disputes about schools and schooling By exploring the major opposing viewpoints on the issues this text encourages education students to think critically and develop their own viewpoints It includes research and scholarship discussion suggestions and bibliographic references

**Bibliographisch repertorium van de wijsbegeerte** ,2004 *Law, Politics, and Morality* Jordi Ferrer Beltrán,Marisa Iglesias Vila,2003 How different cultural groups can be made to live together in justice and fairness in one common political entity has in the past been discussed almost exclusively from the perspective of nation states In an increasingly globalising or

de nationalising world this no longer seems adequate The European Union as a union of states and with an built expansive tendency is a very different unique kind of organization offering a challenging new context for the discussion of how social justice can be ensured in multicultural societies As debates in the post Maastricht era show the European process of regional integration needs to be accompanied by profound reflexions on issues such as multiculturalism democratic legitimacy and the idea of citizenship In three sections on Globalisation and Multiculturalism Deliberation and Democracy and Citizenship and the European Union this book offers such reflexions formulated by young European legal and political philosophers from England Estonia France Italy Spain and Switzerland The papers were discussed at a conference held in November 2001 in Tossa de Mar Spain This was the first of three PhD EuroConferences in Legal Philosophy sponsored by the Commission of the European Union The papers of the other two conferences Nov 2002 Gerona Spain Nov 2003 Genoa Italy are forthcoming in this collection
