Politics and Democracy in Microstates Wouter Veenendaal, 2014-10-17 Why are small states statistically more likely to have a democratic political system By addressing this question from a qualitative and comparative methodological angle this book analyses the effects of a small population size on political competition and participation By comparing the four microstates of San Marino Europe St Kitts and Nevis Caribbean Seychelles Africa and Palau Oceania it provides fresh and stimulating insight concluding that the political dynamics of microstates are not as democratic as commonly believed Instead it is found in all four cases that smallness results in personalistic politics dominance of the political executive patron client relations between citizens and politicians and the circumvention of formal political institutions In addition the book suggests that the study of formal institutions provides an incomplete image of microstate democracy and that informal characteristics of politics in microstates also need to be explored in order to better explain the influence of smallness on democracy This book will be of key interest to scholars and students of democracy democratization regional and decentralization studies and comparative politics

Self-Determination in Western Democracies Guntram F. A. Werther,1992-09-30 This interdisciplinary study offers an analytical and theoretical framework for understanding the dynamics of political change and self determination when indigenous people assert claims of aboriginal status How have certain peoples who make up less than two percent of the national population who are poor and who are dispersed and on the economic and political periphery of the modern western democracies where they live been able to extract legislative and constitutional concessions that allow them greater self determination from large wealthy and powerful ethno national groups Werther s findings which contradict existing ideas should be of considerable interest to students and scholars in political science anthropology ethnic studies international and constitutional law and intellectual history

Following a brief introduction about self determination movements as quiet revolutions and a discussion of theoretical method the study defines aboriginal status and discusses the macrostructuring of political claims micropolitical processes and clashes of claims and aboriginal status in six democratic states Appendixes point to people claiming aboriginal status in the countries under study list those who can legitimately assert this status and offer some considerations on basic definitions important to this cross disciplinary study A bibliography is also provided
