Democratizing Education And Educating Democratic Citizens International And Historic Perspectives:

Democratizing Education and Educating Democratic Citizens Leslie J. Limage,2013-10-08 The essays in the book are organized into three sections in order to address the conceptualization of democracy and citizenship reform efforts towards democratization in various societies and educational efforts to foster democratic citizens Each is written from a different historical and national perspective by an international panel of prominent comparative education scholars and each tackles the theme of democracy and civic duty in education

Citizenship Education in Germany Stephanie Wilde,2004-01-01 This volume focuses on cross curricular and extra curricular activities within the broader context of citizenship education in secondary schools in Germany It sets out the background and history of citizenship education in Germany before moving on to selected case studies of specific activities in secondary schools in different federal states in eastern and western Germany These case studies focus on activities centred on two main topics intercultural education and the National Socialist period in Germany These activities are not part of formal schooling but rather represent examples of young people and teachers engaging in citizenship education beyond the classroom or in a positive sense not doing it by the book

Education of Minorities and Peace Education in Pluralistic Societies Yaacov Iram,2003-05-30 The existence of minorities will grow in most countries of the world because of sociopolitical upheaval and economic crisis both of which result in waves of migration Contributors to this volume discuss the task of education to alleviate the problems arising from the mix of peoples of various ethnic cultural linguistic and religious backgrounds No education system alone can create a just and equal society and education by itself is not enough to achieve peace Nevertheless educational efforts assisted by other institutional commitments and actions are essential in order to create an atmosphere of justice mutual recognition and acceptance as preconditions for peaceful coexistence within groups and between people As a result of worldwide migration in reaction to wars and other geopolitical conflicts as well as economic crisis many modern nation states consist of a mix of people of various ethnic cultural linguistic and religious backgrounds Indeed there are very few countries that are monocultural Here contributors discuss how it is imperative that multicultural education be promoted to achieve awareness then tolerance and finally acceptance of ethnic and other diversity within societies

Changing Educational Landscapes
 Dimitris Mattheou, 2010-04-08 Analyzing educational landscapes the fundamental values principles and institutions of the sector is a highly complex and demanding task for any researcher Like shifting desert sands these aspects of education are in a constant state of flux changing according to the unpredictable economic social cultural and geo political circumstances of late modernity Key aspects of the intricate fluid and multifarious contemporary setting can always escape the researcher s necessarily selective observation The contributors to this book share the view that it is wise therefore to take note of other people s ideas perceptions and perspectives to compare notes and reflect critically on them Thus the papers presented here are a critical and comparative analysis of today s changing educational landscapes They are an exploration of some of the forces and factors that induce these changes and also examine some of their most significant implications The work takes a fresh look at received ideology and institutional practices and delineates the increasingly internationalized educational discourses and policies Among other things the book discusses the obsession with quality in education and the alternative perceptions of educational equality the rising concern at the obstacles to truly multicultural education and the debate about the epistemological foundations both of knowledge and knowledge production Underlying all of the papers in the book is the authors intention to enhance our understanding of educational change in this era of transition and to further our appreciation of its multifaceted expressions across the world

Education and Political Transition Mark Bray, W. O. Lee, 2001 This edition throws light on the links between education and political transition in a dynamic part of the world Themes addressed by the book include globalization internationalization and localization democratization and nationalization and liberal versus democratic approaches

Peace Or Violence Jeff Astley, Leslie J. Francis, Mandy Robbins, 2007 Religion s impact on world politics has been of major concern since the 9 11 terrorist attacks and America s military response Peace or Violence addresses the timely question of the role of religious education does it merely inculcate the fundamentalist mindset that leads to sectarian violence or can it instead promote peace Through an analysis and evaluation of many of the different models of religious education across the Western world this book considers religion s role in a polarized and globalized world The contributors gathered here persuasively argue that religious education s responsibility is to inform and enrich communal life
