that the buck passing account faces such as the wrong kind of reason problem Less attention however has been paid as to why we should accept the buck passing account or what the theoretical pay offs and other implications of accepting it are The Normative and the Evaluative provides the first comprehensive motivation and defence of the buck passing account of value Richard Rowland argues that the buck passing account explains several important features of the relationship between reasons and value as well as the relationship between the different varieties of value in a way that its competitors do not He shows that alternatives to the buck passing account are inconsistent with important views in normative ethics uninformative and at odds with the way in which we should see practical and epistemic normativity as related In addition he extends the buck passing account to provide an account of moral properties as well as all other normative and deontic properties and concepts such as fittingness and ought in terms of reasons
