*William Hunter and his Eighteenth-Century Cultural Worlds* Helen McCormack, 2017-10-12 The eminent physician and anatomist Dr William Hunter 1718 1783 made an important and significant contribution to the history of collecting and the promotion of the fine arts in Britain in the eighteenth century Born at the family home in East Calderwood he matriculated at the University of Glasgow in 1731 and was greatly influenced by some of the most important philosophers of the Scottish Enlightenment including Francis Hutcheson 1694 1746 He quickly abandoned his studies in theology for Medicine and in 1740 left Scotland for London where he steadily acquired a reputation as an energetic and astute practitioner he combined his working life as an anatomist successfully with a wide range of interests in natural history including mineralogy conchology botany and ornithology and in antiquities books medals and artefacts in the fine arts he worked with artists and dealers and came to own a number of beautiful oil paintings and volumes of extremely fine prints He built an impressive school of anatomy and a museum which housed these substantial and important collections William Hunter s life and work is the subject of this book a cultural anthropological account of his influence and legacy as an anatomist physician collector teacher and demonstrator Combining Hunter s lectures to students of anatomy with his teaching at the St Martin s Lane Academy his patronage of artists such as Robert Edge Pine George Stubbs and Johan Zoffany and his associations with artists at the Royal Academy of Arts the book positions Hunter at the very centre of artistic scientific and cultural life in London during the period presenting a sustained and critical account of the relationship between anatomy and artists over the course of the long eighteenth century

*Objectivity* Lorraine Daston, Peter L. Galison, 2021-02-02 Objectivity has a history and it is full of surprises In *Objectivity* Lorraine Daston and Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular scientific community Embedded in the

atlas image therefore are the traces of consequential choices about knowledge persona and collective sight Objectivity is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically

The English Virtuoso Craig Ashley Hanson,2009-05-15 This study aims to overturn 20th century criticism that cast the English virtuosi of the 17th and early 18th centuries as misguided dabblers arguing that they were erudite individuals with solid grounding in the classics deep appreciation for the arts and sincere curiosity about the natural world

**The Rise and Fall of Modern Empires, Volume II** Saul Dubow,2016-12-05 This volume reproduces key historical texts concerning colonial knowledges The use of the adjective colonial indicates that knowledge is shaped by power relationships while the use of the plural form knowledges indicates the emphasis in this collection is on an interplay between different often competing cognitive systems George Balandier s notion of the colonial situation is an organising principle that runs throughout the volume and there are four sub themes language and texts categorical knowledge the circulation of knowledge and indigenous knowledge The volume is designed to introduce students to a range of important interventions which speak to each other today even if they were not intended to do so when first published An introductory essay links the themes together and explains the significance of the individual articles

*Echoes of Care* Jaipreet Virdi,2025-02-11 More than one billion people live with hearing loss making deafness one of the most common disabilities in the world Despite the size of deaf communities and their rich cultural histories in the Western world deafness is perceived primarily as a medical problem requiring a fix In nineteenth century Britain the shift from viewing deafness as auditory difference to framing it as a condition in need of medical intervention came at the insistence of an emerging group of professionals aurists *Echoes of Care* describes how British ear specialists sought to reshape deafness as a curable affliction that they were uniquely able to treat Navigating a medical landscape fraught with professional rivalries and public distrust about the likelihood of a cure aurists extended their authority towards key sites of intervention the census school medical testing public health deaf schools to argue for the necessity of specialist care Beneath the surface of these claims lay deeper questions about access to healthcare cultural perceptions of disability and the rise of eugenics Jaipreet Virdi explores the complex legacy of the medicalization of deafness and its profound implications for deaf history culture and lived experience

*Gender, Sexualities and Law* Jackie Jones,Anna Grear,Rachel Anne Fenton,Kim Stevenson,2011-03-17 Bringing together an international range of academics *Gender Sexualities and Law* provides a comprehensive interrogation of the range of contemporary issues both topical and controversial raised by the gendered character of law legal discourse and institutions The gendering of law persons and the legal profession along with the gender bias of legal outcomes has been a fractious but fertile focus of reflection It has moreover been an important site of political struggle This collection of essays offers an unrivalled examination of its various contemporary dimensions focusing on issues of theory and representation violence both national and international reproduction and parenting and partnership sexuality marriage and the family *Gender Sexualities and Law* will be invaluable

for all those engaged in research and study of the law and related fields as a form of gendered power

**Defining Features** Ludmilla Jordanova, 2012-12-24 Portraiture as a genre is receiving increased attention at the same time that public curiosity about science is reaching unprecedented levels Published to coincide with a major exhibition at the National Portrait Gallery London from 14 April 17 September 2000 and the Sainsbury Centre for Visual Arts University of East Anglia from 27 September 10 December 2000 Defining Features brings portraiture and science together Ludmilla Jordanova's lucid text reflects on the nature of the relationship between art science medicine and technology by focusing on a selection of portraits that spans more than three centuries Illustrated with likenesses of such notable personalities as Edward Jenner Marie Curie Charles Darwin Albert Einstein and Dorothy Hodgkin and encompassing a variety of media from paintings and medals to bookmarks and key rings Defining Features charts changing attitudes towards medical practice and scientific investigation as well as exploring how notions of gender heroism popularization and celebrity have affected the public's understanding of how researchers do their work
