## Defining Sustainable Forestry:

**Defining Sustainable Forestry** Greg Aplet, Nels Johnson, Jeffrey T. Olson, Al Sample, 1993-10-01 Before the transition in forestry can be made from conventional approaches of the past century to the ecosystem approach of the next a consensus must be reached on the meaning of sustainable forestry *Defining Sustainable Forestry* presents the results of a national conference convened by The Wilderness Society American Forests and the World Resources Institute to help establish a common framework upon which to guide the future development of forestry *Fairly Sustainable Forestry*, 2008 **Forest Sustainability** Michael P. Amaranthus, 1997

**Defining Sustainable Forestry** Greg Aplet, 1993-10 Before the transition in forestry can be made from conventional approaches of the past century to the ecosystem approach of the next a consensus must be reached on the meaning of sustainable forestry *Defining Sustainable Forestry* presents the results of a national conference convened by The Wilderness Society American Forests and the World Resources Institute to help establish a common framework upon which to guide the future development of forestry *Defining Sustainable Forest Management* Canadian Council of Forest Ministers, 1995 Forests are essential to the long term well being of Canada's communities economy and environment This document presents a Canadian approach to criteria and indicators on sustainable forest management Topics covered are conservation of biological diversity maintenance and enhancement of forest ecosystem condition and productivity conservation of soil and water resources forest ecosystem contributions to global ecological cycles multiple benefits to society and accepting society's responsibility for sustainable development *Pathway to Sustainability* John Fedkiw, Douglas W. MacCleery, V. Alaric Sample, 2004 The progress of forest management in the United States A broad and bounded path that leads us to the goal of sustainability Or a tree that branches as it grows Or chaos Four noted scholars offer their views on the evolution of forestry Hal Salwasser dean and director of the forest research laboratory at Oregon State University's College of Forestry poses provocative questions about the nature of forestry as the discipline seeks to meet society's needs while conserving the resource John Fedkiw senior policy adviser and analyst for USDA Secretary's Office for 28 years believes the same pathway that has led forestry through the thickets of multiple use and ecosystem management can now take us to our new goal sustainability Douglas W MacCleery senior policy analyst in forest and rangeland management for the National Forest System finds reason for optimism in the record of the past where he sees evidence that forestry can meet its latest challenge V Alaric Sample president of the Pinchot Institute for Conservation cautions that conserving biodiversity will require new approaches and adjustment of our course along the pathway These papers enlighten and illuminate sustainability both as a dynamic goal and a dynamic process and outline the challenges it presents to society its policy makers and forest managers They help us to understand sustainability in its political dimensions and to approach sustainability systematically as a dynamic integrative societal process on the land *Global Forest Governance* R. Maguire, 2013-03-01 This work provides an important broad and legal critique and assessment of transnational trends

structures and innovations currently in use for managing forests *Toward Sustainability for Missouri Forests*, 2004

**Defining Sustainable Forest Management in Canada** Canadian Council of Forest Ministers, 2003 *Monitoring for Forest Management Unit Scale Sustainability* Pamela A. Wright, 2002 **Ecological Bulletins, Targets and Tools for the Maintenance of Forest Biodiversity** Per Angelstam, Monica Donz-Breuss, Jean-Michel Roberge, 2009-05-06 Maintaining forest biodiversity by combining protection management and restoration of forest and woodland landscapes is a central component of sustainable development Evidence that there are threshold levels for how much habitat loss may be tolerated for viable populations of specialised species to be maintained Policy makers businesses and managers pose questions about how to balance use of renewable forest resources and conserve biodiversity Examples are presented on how biodiversity assessments can be made Proposes how the critical gaps in our knowledge identified throughout the book could be filled through macroecological research and international co operation **Forest Certification: A Policy Perspective** Chris Elliott, 2000-01-01 This paper analyses the development of certification programmes in three countries Indonesia Canada and Sweden using the Advocacy Coalition Framework ACF as a theoretical reference point The ACF is an actor based framework for analysing policy processes and has not previously been applied in a developing country Actors in the three countries took different approaches to certification In Canada in a programme development process supported by the forest products industry a management systems approach was taken In Sweden performance standards were developed in a process initially driven by NGOs In Indonesia certification was led by an NGO within a framework established by government and a performance standards approach was used The paper concludes that forest certification can be best understood as a policy instrument that promotes and facilitates policy orientated learning among actors and provides indirect incentives for improved forest management Learning occurs both as the standards to be used for certification are developed and as they are implemented The benefits of learning and consensus building among actors such as NGOs forest companies private forest owners indigenous peoples governments etc who have traditionally been in conflict with each other can be significant On the other hand where fundamental changes in forest policy such as tenure and forest revenue reform are needed certification should not be seen as a substitute for these A further conclusion is that while public policies change over periods of decades the private policies of retailers and forest product companies can adapt more rapidly to changing circumstances The concept of a fast track of private policy change compared to the slower track of governmental policy change is therefore proposed and described A number of interesting theoretical and empirical avenues for further research on certification are discussed

*General Technical Report NC.*, 1981 **Stumbling Toward Sustainability** John C. Dernbach, 2002 In 1992 at the United Nations Conference on Environment and Development in Rio de Janeiro the nations of the world agreed to implement an ambitious plan for ecologically sustainable human development This book is a comprehensive review of U S efforts to achieve such development since Rio The U S has unquestionably begun to take steps toward sustainable development Yet the

nation is now far from being a sustainable society and in many respects is farther away than it was in 1992 Nevertheless legal and policy tools are available to put the U S on a direct path to sustainability This book brings together 42 distinguished experts from a variety of backgrounds and academic disciplines It is among the most thorough assessments ever conducted of U S law and policy concerning the environment *Forest Management for Bioenergy* Pentti Hakkila, Maija Heino, Essi Puranen, 1997 *Unasylva*, 2007 **SSSA Special Publication**, 1998 **Backgrounder** Canadian Council of Forest Ministers, 1995 *Nontimber Forest Products in the United States* Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests *The Forestry Chronicle*, 2003
