Defusing Default Incentives And Institutions:

Defusing Default Marco Pagano, 2001 This book uses a variety of perspectives and tools including theoretical modeling and cross country evidence to examine the costs and benefits of protecting creditor rights Case studies look at creditor protection in Argentina Brazil Chile Costa Rica Paraguay and Peru The studies find that more effective judicial enforcement would help to make more credit available and improve the overall performance of the credit market Midwest **When Do Creditor Rights Work?** Siddharth Sharma, Mehnaz Safavian, *The Economics of Consumer Credit* Giuseppe Bertola, Richard Disney, Charles Benedict Grant, 2006 Cross national analysis of empirical theoretical and policy issues in the consumer credit industry including household debt credit card usage and bankruptcy **Annual World Bank Conference on Development Economics Regional 2007** François Bourguignon, Boris Pleskovic, 2007-01-01 Global Development Finance GDF is the World Bank's annual review of recent trends in and prospects for financial flows to developing countries It is an indispensable resource for governments economists investors financial consultants academics bankers and the entire development community Vol I Analysis and Outlook reviews recent trends in financial flows to developing countries Also available as a two volume set Vol II Summary and Country Tables includes comprehensive data for 138 countries as well as summary data for regions and income groups **Credit Constraints and Investment in Latin America** Arturo J. Galindo, Fabio Schiantarelli, 2003 **Economic Information and Finance** Roumeen Islam, 2007 This paper builds on recent work that shows how financial sector outcomes are affected by the provision of information by financial and other entities In particular it shows that an indicator of economic transparency is positively related to higher levels of private credit and a lower share of nonperforming loans even after accounting for factors commonly believed to influence financial sector development in cross country empirical estimation Timely access to economic data allows investors to make better decisions on investments and to better monitor banks financial health Greater economic transparency raises accountability and lowers corruption in bank lending **World Development Report 2017** World Bank Group, 2017-02-02 Why are carefully designed sensible policies too often not adopted or implemented When they are why do they often fail to generate development outcomes such as security growth and equity And why do some bad policies endure World Development Report 2017 Governance and the Law addresses these fundamental questions which are at the heart of development Policy making and policy implementation do not occur in a vacuum Rather they take place in complex political and social settings in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests The process of these interactions is what this Report calls governance and the space in which these interactions take place the policy arena The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness However who bargains who is excluded and what barriers block entry to the policy arena determine the selection and implementation of policies and consequently their impact on development outcomes Exclusion

capture and clientelism are manifestations of power asymmetries that lead to failures to achieve security growth and equity. The distribution of power in society is partly determined by history. Yet there is room for positive change. This Report reveals that governance can mitigate even overcome power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security growth and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement as well as by international actors supporting rules that strengthen coalitions for reform.

Firms and entrepreneurs of all types from microenterprises to multinationals play a central role in growth and poverty reduction. Their investment decisions drive job creation, the availability and affordability of goods and services for consumers, and the tax revenues governments can draw on to fund health, education, and other services. The World Development Report 2005 argues that improving the investment climates of their societies should be a top priority for governments. Drawing on surveys of nearly 30,000 firms in 53 developing countries, country case studies, and other new research, the Report explores questions such as: What are the key features of a good investment climate and how do they influence growth and poverty? What can governments do to improve their investment climates and how can they go about tackling such a broad agenda? What has been learned about good practice in each of the main areas of the investment climate? What role might selective interventions and international arrangements play in improving the investment climate? What can the international community do to help developing countries improve the investment climates of their societies? In addition to detailed chapters exploring these and related issues, the Report contains selected data from the World Bank's new program of Investment Climate Surveys, the Bank's Doing Business Project, and World Development Indicators 2004. This Report offers practical insights for policymakers, executives, scholars, and all those with an interest in economic development.
