**Blankets of Fire** Kenneth P. Werrell, 1996      **Inferno** Edwin P. Hoyt, 2000-10-11 Did the bombing of Japan's cities culminating in the nuclear destruction of Hiroshima and Nagasaki hasten the end of World War II Edwin Hoyt World War II scholar and author argues against the U S justification of the bombing In his new book Inferno Hoyt shows how the U S bombed without discrimination hurting Japanese civilians far more than the Japanese military Hoyt accuses Major General Curtis LeMay the Air Force leader who helped plan the destruction of Dresden of committing a war crime through his plan to burn Japan's major cities to the ground The firebombing raids conducted by LeMay's squadrons caused far more death than the two atomic blasts Throughout cities built largely from wood incendiary bombs started raging fires that consumed houses and killed hundreds of thousands of men women and children The survivors of the raids recount their stories in Inferno remembering their terror as they fled to shelter through burning cities escaping smoke panicked crowds and collapsing buildings Hoyt's descriptions of the widespread death and destruction of Japan depicts a war machine operating without restraint Inferno offers a provocative look at what may have been America's most brutal policy during the years of World War II

**Bombers Over Japan** Keith Wheeler, Time-Life Books, 1998 Profusely illustrated text documents the decisive part played by bombers in bringing about the ultimate capitulation of Japan in World War II

**Japan 1944-45** Mark Lardas, 2019-02-21 The air campaign that incinerated Japan's cities was the first and only time that independent air power has won a war As the United States pushed Imperial Japan back towards Tokyo Bay the US Army Air Force deployed the first of a new bomber to the theater The B 29 Superfortress was complex troubled and hugely advanced It was the most expensive weapons system of the war and formidably capable But at the time no strategic bombing campaign had ever brought about a nation's surrender Not only that but Japan was half a world away and the US had no airfields even within the extraordinary range of the B 29 This analysis explains why the B 29s struggled at first and how General LeMay devised radical and devastating tactics that began to systematically incinerate Japanese cities and industries and eliminate its maritime trade with aerial mining It explains how and why this campaign was so uniquely successful and how gaps in Japan's defences contributed to the B 29s success

**The Firebombing of Tokyo** Charles River Charles River Editors, 2018-02-08 Includes pictures Includes accounts of the firebombing by both Americans and Japanese civilians in Tokyo Includes online resources and a bibliography for further reading Includes a table of contents Maj Gen Curtis E LeMay commander of the B 29s of the entire Marianas area declared that if the war is shortened by a single day the attack will have served its purpose The New York Times As American forces pushed the Japanese back across the Pacific from 1942 1944 their island hopping campaign ultimately made it possible for the Air Force to conduct bombing runs over the Japanese mainland The first serious air raids came in November 1944 after the Americans had captured the Marianas Islands and through February 1945 American bombers concentrated on military targets at the fringes of the city particularly air defenses However the air raids of March 1945 and particularly on

the night of March 9 were a different story altogether In what is generally referred to as strategic or area bombing waves of bombers flew low over Tokyo for over two and a half hours dropping incendiary bombs with the intention of producing a massive firestorm The American raids intended to produce fires that would kill soldiers and civilians as well as the munitions factories and apartment buildings of those who worked in them 325 B 29s headed toward Tokyo and nearly 300 of them dropped bombs on it destroying more than 267 000 buildings and killing more than 83 000 people making it the deadliest day of the war The firebombing that night and morning left 25% of Tokyo charred with the damage spread out over 20 miles of the metropolis In fact the damage was so extensive that casualty counts range by over 100 000 Additional raids this time largely on the north and west came in April and in May raids hit Ginza and the south Altogether American bombers flew more than 4 000 missions over Tokyo before surrender The damage was spread widely but it was worst in the low city where some neighborhoods were virtually depopulated as survivors fled to the relative safety of the countryside Honjo and Fukagawa each lost roughly 95% of their pre raid populations In 1940 Tokyo was a city of perhaps 6 8 million but two years after the end of the war when the population had already begun to increase again it was still no more than 4 1 million As with dropping the atomic bombs on Hiroshima and Nagasaki the firebombing of Tokyo has remained controversial since the end of World War II Japan had wisely spread out its industrial facilities across Tokyo so that one concerted attack could not deal a severe blow to its military capabilities However by spreading everything out as the Germans had also done Allied planes hit targets in residential zones greatly increasing the casualties Thus by destroying as much of Tokyo s wartime manufacturing as possible the American air force also destroyed half the city Of course it s far easier with the advantage of hindsight for people to call the campaign disproportionate especially since the bombing campaign came at a time when the United States still faced the dreadful prospect of invading Japan s mainland In 2007 Japanese Prime Minister Abe Shinzo took responsibility for Japan s refusal to surrender when defeat was inevitable thus placing the blame for the firebombing on Japan itself Shinzo announced that Japan would financially compensate survivors and bereaved family members of those killed and shortly after the announcement 112 survivors filed a lawsuit seeking damages for damage done during the campaign The Firebombing of Tokyo The History of the U S Air Force s Most Controversial Bombing Campaign of World War II chronicles the background of the campaign its destruction and its notorious legacy Along with pictures of important people places and events you will learn about the firebombing of Tokyo like never before in no time at all [The Effects of Strategic Bombing on Japan's War Economy](#) United States Strategic Bombing Survey, United States Strategic Bombing Survey. Overall Economic Effects Division, 1946 **Mission to Tokyo** Robert F. Dorr, 2012-09-15 From Hell Hawks author Bob Dorr Mission to Tokyo takes the reader on a World War II strategic bombing mission from an airfield on the western Pacific island of Tinian to Tokyo and back Told in the veterans words Mission to Tokyo is a narrative of every aspect of long range bombing including pilots and other aircrew groundcrew and escort fighters that accompanied the heavy bombers on their perilous mission Several

thousand men on the small Mariana Islands of Guam Saipan and Tinian were trying to take the war to the Empire Imperial Japan in B 29 Superfortresses flying at 28 000 feet but the high altitude bombing wasn't very accurate The decision was made to take the planes down to around 8 000 feet even as low as 5 000 feet Eliminating the long climb up would save fuel and allow the aircraft to take heavier bomb loads The lower altitude would also increase accuracy substantially The trade off was the increased danger of anti aircraft fire This was deemed worth the risk and the devastation brought to the industry and population of the capital city was catastrophic Unfortunately for all involved the bombing did not bring on the quick surrender some had hoped for That would take six more months of bombing culminating in the atomic bombs dropped on Hiroshima and Nagasaki As with Mission to Berlin Spring 2011 Mission to Tokyo focuses on a specific mission from spring 1945 and provides a history of the strategic air war against Japan in alternating chapters

**Burning Japan** DANIEL T. SCHWABE,2015-01-01 Burning Japan is an investigation of how and why the air force shifted its tactics against Japan from a precision bombing strategy to area attacks The guiding doctrine of the 1930s and 1940s called for focused attacks on specific targets deep behind enemy lines Eager to prove itself the nascent Army Air Force at first lauded the indispensability of strategic bombardment in areas otherwise unreachable by the army or navy But when strategic bombing failed to yield the desired results in Europe and in initial efforts against Japan the United States switched tactics a shift that culminated in the area firebombing of nearly every major Japanese metropolis and the burning of sixty six cities to the ground

**Zero, the Story of Japan's Air War in the Pacific - As Seen by the Enemy** Martin Caidin,2012-04-25 This is the thrilling saga of war in the air in the Pacific Theater of Operations during World War II told from the Japanese point of view It is the story of the men who created led and fought in the deadly Zero fighter plane In their own words Jiro Horikoshi who designed the Zero Masatake Okumiya leader of many Zero squadrons and Saburo Sakai Japan's leading surviving fighter ace as well as many other men tell the inside story of developing the Zero and Japan's air force They tell what it felt like to bomb American ships and to shoot down American airplanes and then of their shock when the myth of invincibility was shattered by the new Lightning Hellcat and Corsair fighters They tell of the fight against the growing strength of a remorseless American enemy and how in desperation the Japanese High Command ordered the creation of deadly suicide squadrons the Kamikaze And finally they reveal their reaction to the dropping of the atomic bombs on Hiroshima and Nagasaki

**Cultural Responses to Occupation in Japan** Adam Broinowski,2016-01-14 Cultural Responses to Occupation in Japan examines how the performing arts and the performing body specifically have shaped and been shaped by the political and historical conditions experienced in Japan during the Cold War and post Cold War periods This study of original and secondary materials from the fields of theatre dance performance art film and poetry probes the interrelationship that exists between the body and the nation state Important artistic works such as Ankoku Butoh dance of darkness and its subsequent re interpretation by a leading political performance company Gekidan Kaitaisha theatre of deconstruction are analysed using ethnographic

historical and theoretical modes This approach reveals the nuanced and prolonged effects of military cultural and political occupation in Japan over a duration of dramatic change Cultural Responses to Occupation in Japan explores issues of discrimination marginality trauma memory and the mediation of history in a ground breaking work that will be of great significance to anyone interested in the symbiosis of culture and conflict [Hitting Home - The Air Offensive Against Japan \[Illustrated Edition\]](#) Daniel L. Haulman,2015-11-06 Includes 20 illustrations The strategic bombardment of Japan during World War II remains one of the most controversial subjects of military history because it involved the first and only use of atomic weapons in war It also raised the question of whether strategic bombing alone can win wars a question that dominated U S Air Force thinking for a generation Without question the strategic bombing of Japan contributed very heavily to the Japanese decision to surrender The United States and her allies did not have to invade the home islands an invasion that would have cost many thousands of lives on both sides This pamphlet traces the development of the bombing of the Japanese home islands from the modest but dramatic Doolittle raid on Tokyo in April 1942 through the effort to bomb from bases in China that were supplied by airlift over the Himalayas to the huge 500 plane raids from the Marianas in the Pacific The campaign changed from precision daylight bombing to night incendiary bombing of Japanese cities and ultimately to the use of atomic bombs against Hiroshima and Nagasaki The story covers the debut of the spectacular B 29 aircraft in many ways the most awesome weapon of World War II and its use not only as a bomber but also as a mine layer Hitting Home is the sequel to High Road to Tokyo Bay a pamphlet by the same author that concentrated on Army Air Forces tactical operations in Asia and the Pacific areas during World War II Taken together they provide an overview of U S Army Air Forces operations tactical and strategic against Japan The U S air offensive against Japan is the central story of the Pacific war a drama of human courage and sacrifice and of a unique partnership among modern air sea and land forces *Defense of Japan 1945* Steven J. and ground fire we were the main act and center stage From that moment everything went into slow motion as we pass through the target seconds felt like minutes and minutes hours BOOM an explosion the plane rocks bucks flak is searing its way through the fragile fabric of the fuselage loose items are flying around Im scared they say you can taste fear well theyre absolutely right This personal view gives us two perspectives the first is the story of Herb Greer speaking to us aboard a B29 through the written entries of his diary and then the second recounted from his armchair 60 years later Written with an immediacy that can only be shared by those who were there while capturing for posterity their bravery and dignity of sacrifice Praise for Fire from the Sky This is a book you will not be able to put down It is a well told memoir of the men whose missions will live forever in history It was my honor to have read the book it felt almost sacred to be allowed to look inside a crew members personal diary truly a treasured artifact of historic and sentimental value This is a book worth reading several times Great black and white photos as well I fully recommend this wonderful book about aviation and the men who crewed B 29s Bill McDonald president of the Military Writers Society of America As an avid reader of military history I found Fire from the Sky A Diary over Japan to be both a treasure trove of information and a stirring and often startling look at the air war over Japan in World War II What comes across in this book is not only the dedication and heroism of a B 29 bomber crew but also the harrowing circumstances of life and death in the air Truly a remarkable book told by a remarkable man who found himself with a job to do that now in the light of the passage of time seems like an incredible and mind boggling achievement This book richly deserves its Silver Medal Award Robert McCammon New York Times bestselling author **The U.S. Strategic Bomber** Roger A.
