## Of Involutions:

*The Book of Involutions* Max-Albert Knus,1998-06-30 This monograph is an exposition of the theory of central simple algebras with involution in relation to linear algebraic groups It provides the algebra theoretic foundations for much of the recent work on linear algebraic groups over arbitrary fields Involutions are viewed as twisted forms of hermitian quadrics leading to new developments on the model of the algebraic theory of quadratic forms In addition to classical groups phenomena related to triality are also discussed as well as groups of type  $F_4$  or  $G_2$  arising from exceptional Jordan or composition algebras Several results and notions appear here for the first time notably the discriminant algebra of an algebra with unitary involution and the algebra theoretic counterpart to linear groups of type  $D_4$  This volume also contains a Bibliography and Index Features original material not in print elsewhere a comprehensive discussion of algebra theoretic and group theoretic aspects extensive notes that give historical perspective and a survey on the literature rational methods that allow possible generalization to more general base rings

**Involutions on Manifolds** Santiago Lopez de Medrano,2012-12-06 This book contains the results of work done during the years 1967 1970 on fixed point free involutions on manifolds and is an enlarged version of the author s doctoral dissertation 54J written under the direction of Professor William Browder The subject of fixed point free involutions as part of the subject of group actions on manifolds has been an important source of problems examples and ideas in topology for the last four decades and receives renewed attention every time a new technical development suggests new questions and methods 62 8 24 63J Here we consider mainly those properties of fixed point free involutions that can be best studied using the techniques of surgery on manifolds This approach to the subject was initiated by Browder and Livesay

Special attention is given here to involutions of homotopy spheres but even for this particular case a more general theory is very useful Two important related topics that we do not touch here are those of involutions with fixed points and the relationship between fixed point free involutions and free  $S^1$  actions For these topics the reader is referred to 23J and to 33J 61J 82J respectively The two main problems we attack are those of classification of involutions and the existence and uniqueness of invariant submanifolds with certain properties As will be seen these problems are closely related If  $T \mathbb{R}^n$  is a fixed point free involution of a homotopy sphere  $\mathbb{R}^n$  the quotient  $\mathbb{R}^n / T$  is called a homotopy projective space On the Perspective Jonquières Involutions Associated with the (2, 1) Ternary Correspondence ...
