DuBois,2012-12-21 A Companion to World War II brings together a series of fresh academic perspectives on World War II exploring the many cultural social and political contexts of the war Essay topics range from American anti-Semitism to the experiences of French African soldiers providing nearly 60 new contributions to the genre arranged across two comprehensive volumes A collection of original historiographic essays that include cutting edge research Analyzes the roles of neutral nations during the war Examines the war from the bottom up through the experiences of different social classes Covers the causes key battles and consequences of the war *D-Day 1944* Stephen Bourque,2022-07-21 An illustrated study of the little known history of the failed Allied bombing campaign designed to shatter German defenses on D Day D Day is one of the most written about events in military history One aspect of the invasion however continues to be ignored the massive pre assault bombardment by the Allied Expeditionary Air Force AEAF reinforced by RAF Bomber Command and the US Eighth Air Force on June 6 which sought to neutralize the German defenses along the Atlantic Wall Unfortunately this failed series of attacks resulted in death or injury to hundreds of soldiers and killed many French civilians Despite an initial successful attack performed by the Allied forces the most crucial phase of the operation which was the assault from the Eighth Air Force against the defenses along the Calvados coast was disastrous The bombers missed almost all of their targets inflicting little damage to the German defenses which resulted in a high number of casualties among the Allied infantry The primary cause of this failure was that planners at Eighth Air Force Headquarters had changed aircraft drop times at the last moment to prevent casualties amongst the landing forces without notifying either Eisenhower or Doolittle This book examines this generally overlooked event in detail answering several fundamental questions What was the AEAF supposed to accomplish along the Atlantic Wall on D Day and why did it not achieve its bombardment objectives Offering a new perspective on a little known air campaign it is packed with illustrations maps and diagrams exploring in detail the features and ramifications of this mission [A Dictionary of Bomber Command, 1939-1945](#) Geoff Simpson,2011 During the Second World War Bomber Command destroyed a significant proportion of Nazi Germany's industries and many cities although at

C. Grayling,2009-05-26 In Among the Dead Cities the acclaimed philosopher A C Grayling asks the provocative question how would the Allies have fared if judged by the standards of the Nuremberg Trials Arguing persuasively that the victor nations have never had to consider the morality of their policies during World War II he offers a powerful moral re examination of the Allied bombing campaigns against civilians in Germany and Japan in the light of principles enshrined in the post war conventions on human rights and the laws of war Grayling begins by narrating the Royal Air Force s and U S Army Air Force s dramatic and dangerous missions over Germany and Japan between 1942 and 1945 Through the eyes of survivors he describes the terrifying experience on the ground as bombs created inferno and devastation among often unprepared men women and children He examines the mindset and thought process of those who planned the campaigns in the heat and pressure of war and faced with a ruthless enemy Grayling chronicles the voices that though in the minority loudly opposed attacks on civilians exploring in detail whether the bombings ever achieved their goal of denting the will to wage war Based on the facts and evidence he makes a meticulous case for and one against civilian bombing and only then offers his own judgment Acknowledging that they in no way equated to the death and destruction for which Nazi and Japanese aggression was responsible he nonetheless concludes that the bombing campaigns were morally indefensible and more that accepting responsibility even six decades later is both a historical necessity and a moral imperative *Moonlight Flyer* John Gellner,Pavel Vancata,2017-03-19 This electronic edition includes 2 black and white maps and 66 black and white photographs One of the many wartime airmen who documented his day to day experiences in a diary was RCAF navigator Jan Gellner Prior to the outbreak of the Second World War Jan was a lawyer practicing in the Czechoslovak town of Brno With the outbreak of hostilities on the European continent he went to Canada and trained as an air observer on the first course of the fledgling British Commonwealth Air Training Plan Jan Gellner began his operational tour with No 311 Czechoslovak B Squadron flying the venerable Vickers Wellington It did not take long for Jan s abilities to shine especially as an instructor in astro navigation For his farrowing role in the attack on the German cruise Prinz Eugen Jan received the coveted Distinguished Flying Cross After an incredible 37 operations over occupied France and Germany he became Operational Tour Expired Jan was selected for pilot training and went to Canada During his postwar service with the RCAF he had a distinguished career as an administrative officer retiring in 1958 Now a civilian Jan turned to writing and became one of Canada s most knowledgeable and sought after aviation and military affairs journalist This electronic edition includes 2 black and white maps and 66 black and white photographs *RAF Handbook 1939-1945* David

Edward B. Westermann,2001 Air raid sirens wail searchlight beams flash across the sky and the night is aflame with tracer fire and aerial explosions as Allied bombers and German anti aircraft units duel in the thundering darkness Such cinematic scenes played out with increasing frequency as World War II ground to a close were more than mere stock material for movie melodramas As Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due Long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses During the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures Not surprisingly that aerial Armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies By contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far abovehigh accuracy altitudes and thus allowed Germany to hold out far longer than it might have otherwise Westermann s definitive study sheds new light on every facet of the development and organization of this vital defense arm includi *Their Names Live on* Doug Chisholm,Gerald Hill,University of Regina. Canadian Plains Research Center,2001 The introduction to this book reviews the background to World War II the course of that war and the participation of Saskatchewan its residents in the conflict The main section tells the stories of 78 Saskatchewan men who gave their lives in that war and describes the geographical feature of the province named after them The appendix contains a comprehensive list of Saskatchewan s World War II casualties **Strategic Air Offensive Against Germany 1939-1945** Charles Kingsley Webster,Noble Frankland,2006 No aspect of the Second World War has become more controversial in recent years than Britain s Strategic Air Offensive against Germany Argument has raged over both the morality of mass bombing of heavily populated cities over its effectiveness in seriously impairing Germany s war effort and over the horrendous casualty rates caused both to civilians on the ground and

to the aircrew of RAF Bomber Command who lost some 52 000 men a higher attrition rate than any other branch of the armed services In assessing the campaign the official British history of the offensive of which this is the fourth and final volume is indispensable This book contains the background documents some highly secret on which the previous narratives of the campaign are based There are chapters on radar that war winning British invention on navigational aids on bombs and bombsights and on post war British and US surveys into the effectiveness of their devastating attacks There are minutes mem oranda operational orders and reports from the key figures involved in directing the air war Sir Arthur Bomber Harris himself Sir John Dill Sir Charles Portal and from the father of the RAF Lord Trenchard There are also important papers from the other side of the hill the Germans including police reports on the firestorm which swept away the port of Hamburg and personal reports from Armaments Minister Albert Speer to Hitler on the results of the RAF blitz on German oil and fuel production in June 1944 The book also contains fascinating facts and figures on losses to aircrew tonnage of bombs dropped the RAF s order of battle and estimates of damage done and civilian casualties Altogether this essential book gives the hard facts on which any conclusions about Britain s air offensive must ultimately be based *The Relentless Offensive* Roy Irons,2009-06-25 During the years before World War II the Royal Air Force created amid the bloodshed of the Great War saw salvation in the doctrine of a relentless offensive by a bomber force which would sail over trenches and then on to the enemy cities and annihilate the ability of the enemy to wage war This book gives a view of how that doctrine driven by courage and coldly sharpened by scientists brought those visions to reality This is a fresh analysis of Bomber Command its tactics and technology It discusses exactly how well organised Bomber Command was to exploit the rapidly evolving new science and technology of new type of warfare How much did the concept of Allied and German morale influenced the Commands operational plans What was the influence of the Research and Experiments Dept of the Ministry of Home Security and of university scientists such as Tizard and Cherwell This book delves into the research into high explosives and firebombing techniques newly designed bombs and their devastating effect on the enemy Why in the early war days was the RAF bombers armament so ineffective the navigation so imprecise and the bombing accuracy so poor This book also discusses the many varying moral issues that even to this day still rage between those who feel guilt for the destruction of so many German cities and those who see moral justification in the eventual Allied victory Hitler's Northern War Adam R. A. Claasen,2001 Adolf Hitler had high hopes for his conquest of Norway which held both great symbolic and great strategic value for the Fuhrer Despite early successes however his ambitious northern campaign foundered and ultimately failed Adam Claasen for the first time reveals the full story of this neglected episode and shows how it helped doom the Third Reich to defeat Hitler and Raeder the chief of the German navy were determined to take and keep Norway By doing so they hoped to preempt Allied attempts to outflank Germany protect sea lanes for German ships access precious Scandinavian minerals for war production and provide a launchpad for Luftwaffe and naval operations against Great Britain Beyond those strategic objectives Hitler

also envisioned Norway as part of a pan Nordic stronghold a centerpiece of his new world order But as Claasen shows Hitler's grand expectations were never realized Gring's Luftwaffe was the vital spearhead in the invasion of Norway which marked a number of wartime firsts Among other things it involved the first large scale aerial operations over sea rather than land the first time operational objectives and logistical needs were fulfilled by air power and the first deployment of paratroopers Although it got off to a promising start the German effort particularly against British and arctic convoys was greatly hampered by flawed strategic thinking interservice rivalries between the Luftwaffe and navy the failure to develop a long range heavy bomber the diversion of planes and personnel to shore up the German war effort elsewhere and the northern theater's harsh climate and terrain Claasen's study covers every aspect of this ill fated campaign from the 1940 invasion until war's end and shows how it was eventually relegated to a backwater status as Germany fought to survive in an increasingly unwinnable war His compelling account sharpens our picture of the German air force and widens our understanding of the Third Reich's way of war
