Adaptive Responses of Native Amazonians Robert Leonard Carneiro, ALACRAN., 1983 , [Amazonian Indians from Prehistory to the Present](#) Anna Roosevelt, 2022-05-10 Amazonia has long been a focus of debate about the impact of the tropical rain forest environment on indigenous cultural development This edited volume draws on the subdisciplines of anthropology to present an integrated perspective of Amazonian studies The contributors address transformations of native societies as a result of their interaction with Western civilization from initial contact to the present day demonstrating that the pre and postcontact characteristics of these societies display differences that until now have been little recognized

Cultural Anthropology John H. Bodley, 2011-04-16 This introductory text introduces basic concepts in cultural anthropology by comparing cultures of increasing scale and focusing on specific universal issues throughout human history Cultural materials are presented in integrated ethnographic case studies organized by cultural and geographic areas to show how ideological social organization and material features fit together in specific sociocultural systems John H Bodley explicitly seeks a balance between ecological materialist and cultural ideological explanations of sociocultural systems while stressing the importance of individual power seeking and human agency Part One examines domestic scale autonomous tribal cultures Part Two presents politically organized class based civilizations and ancient

empires in the imperial world Part Three surveys global industrial market based civilizations in the contemporary commercial world Cultural Anthropology uniquely challenges students to consider the big questions about the nature of cultural systems

Indigenous Peoples and the Future of Amazonia Leslie Elmer Sponsel,1995 This timely book provides the first examination of the relationship between cultural and environmental variation in the Amazon with special reference to the survival and welfare of indigenous societies The particular strength of this collection is that it emphasizes ongoing changing elements rather than static ones in Amazonian human ecology in the context of colonization Leslie Sponsel and twelve other contributors including archaeologists biological anthropologists cultural ecologists and nutritionists review traditional and changing adaptations of indigenous societies to Amazonian ecosystems they analyze the challenges presented to indigenes by the massive cultural and environmental impact of Westernization They also discuss the applications of research results to the needs interests and priorities of indigenous societies In his concluding chapter Sponsel calls for anthropologists to contribute through their research to the empowerment of indigenous communities and organizations In the Amazon the only people who already know and practice ecologically sound economies are most indigenous societies Documenting their ecologically sound values knowledge and technology is one of the most important tasks for cultural ecology *ACT Newsletter* ,1992
