Treating Addictive Behaviors William R. Miller, Nick Heather, 2013-06-29 About a decade ago psychologists began exploring the commonalities among alcohol and drug abuse smoking and obesity The term substance abuse evolved into the current concept of addictive behaviors which recognizes similarities with other behaviors that do not involve consummatory responses e.g. pathological gambling compulsions sexual deviations Professional societies and journals now have been founded in both Britain and the United States with the purpose of focusing on research and treatment in the area of addictive behaviors As the field has evolved new models have emerged to address the questions and puzzles that face professionals This volume examines some of these current issues and in particular explores common processes of change that seem to cut across the addictive behaviors The chapters are based on papers presented at the Third International Conference on Treatment of Addictive Behaviors which was held at North Berwick Scotland in August of 1984 The conference was organized around an integrative model of stages and processes of change that has been useful in organizing new knowledge about how to intervene with addictive behaviors This model is set forth by its authors Jim Prochaska and Carlo DiClemente in Chapter 1 In Chapter 2 Fred Kanfer expounds his own model of self regulation which overlaps nicely with the Prochaska DiClemente framework and provides a behavioral theoretical context

Self-management and Behavior Change Paul Karoly, Frederick H. Kanfer, 1982

The Addictive Behaviors William R. Miller, 1983 Designed as a handbook for professionals working in the four major areas of substance abuse this volume focuses on current research and knowledge regarding the effectiveness of alternative approaches It includes reviews of current research in each area specifically examining common ground in etiology process and treatment

The International Journal of the Addictions, 1990 *American Recreation Journal*, 1961 *Changing Addictive Behavior* Jalie A. Tucker, Dennis M. Donovan, G. Alan Marlatt, 2001-02-15 This volume proposes that prevailing clinical approaches to treating addictive behaviors are actually best suited to a minority of the population with problems in the case of substance abusers those with substantial functional impairment and physical dependence But what about persons with mild to moderate addictive behavior problems for whom intensive treatment may prove unnecessarily costly disruptive and stigmatizing Or those substance abusers who are unable or unmotivated to abstain but want to reduce the harm associated with drug use Contributors draw upon cutting edge theory and research to examine ways that traditional therapeutic

treatments can be supplemented by public health interventions that extend the reach and effectiveness of care. Timely and pragmatic, the book points the way toward necessary evolutions in the roles of behavior change specialists in today's challenging health care environment. *Archives of Internal Medicine*, 1929

Adult Psychopathology and Diagnosis
Michel Hersen, Samuel M. Turner, 1991-05-01

Revised to reflect significant changes in the field, this textbook provides a thorough overview of major diagnostic categories of adult psychiatric disorders using DSM nomenclature. Since publication of the first edition in 1984, DSM III-R has appeared, DSM-IV is anticipated, and data has been adduced in support of existing diagnostic categories and new semi-structured and structured interview schedules have been developed. Taking full account of these changes, it contains 17 chapters, 10 of them totally new and the remainder substantially revised. Divided into three parts, the text begins with an overview of models of psychiatric classification and practical use of DSM III-R. The second part offers a detailed clinical picture of specific syndromes, covering crucial diagnostic criteria, major theories of etiology, and emphasis on assessment and measurement of behavior comprising the syndrome. It closes with a discussion of special topics related to DSM III-R.

Sexual Addiction Aviel Goodman, 1998

A psychoanalyst in private practice describes the biological, sociocultural, and psychoanalytic theories of sexual addiction and integrates them into a coherent approach. He then discusses diagnostic criteria, differential diagnosis, relevant epidemiological data, and treatment modalities for sexual addiction and related conditions. He presents details of five clinical vignettes. Psychiatrists and other mental health professionals are the intended readers, but other professionals may also be interested.
