Adolescent Runaway Behavior Who Runs And Why

Thomas Griffiths

Adolescent Runaway Behavior Who Runs And Why:

Adolescent Runaway Behavior Michael E. Rohr, 1997 First published in 1997 Routledge is an imprint of Taylor Francis an informa company The Oxford Handbook of Emerging Adulthood Jeffrey Jensen Arnett, 2016 The Oxford Handbook of Emerging Adulthood is the first and only comprehensive compilation spanning the field of emerging adulthood *Teenage Runaways* Laurie Schaffner, 2014-01-21 *Teenage Runaways Broken Hearts and Bad Attitudes* uncovers the perspectives of actual teenage runaways to help professionals parents and youths understand the widespread social problem of last resort behavior You ll learn the real reasons teenagers run away and you ll hear the anguished voices of the teenage runaways themselves shattering the myth that only bad kids runaway *Teenage Runaways* deflates popular misconceptions that runaways are incorrigible delinquents who want to leave home that they make impulsive decisions to leave their families and that they wish to never return Reporting on a qualitative study of 26 runaways in a shelter in New England this book reveals that many teenaged runaways leave home in search of safety and freedom from what they consider abusive treatment whether physical sexual or emotional In *Teenage Runaways* you will discover valuable information about who these children are why they are running away and what you can do to help Specifically you will read about why teenagers say they run away running away as last resort behavior what the experience of running away is like hope and desire for reconciliation with parents and family running away as a dynamic emotional experience for youths which reflects changes in their social bonds with peers family and adults in the educational legal and medical systems emotional capital from a heavily regulated authoritative environment *Teenage Runaways* provides you with a new understanding of teens in trouble to assist you in providing services to this needy and vulnerable population First hand accounts reveal the emotional motivations behind decisions to run away such as 14 years old Isabel who gives a painful account of what severe physical and sexual abuse feels like to an adolescent victim Amy also 14 tells her story of living with a mother who was extremely strict and betrayed her

Adolescents Inger P. Davis, 2012-12-06 This book deals with ways of helping families cope with the difficulty of raising adolescents Professional social workers along with other human service professionals encounter these families in numerous settings child welfare and family service agencies hospitals schools community mental health clinics residential treatment centers juvenile halls and detention centers recreational and vocational training organizations and many others While families from all walks of life may be found in these settings families who have suffered the additional stresses of poverty discrimination and the consequences of physical and mental illness are commonly overrepresented Even under the best of circumstances the adolescent years often put the strongest family structures to the test sometimes to the breaking point A recent national study of over one thousand average middle income two parent families reviewed the strengths stresses and satisfactions of the family life cycle Olson and McCubbin 1983 As many would expect families with adolescents were found to experience more stress and lower levels of family adaptability cohesion and marital and family satisfaction than any other

developmental stage The families with adolescents who fared best were those with such marital resources as good communication and conflict resolution skills satisfying sexual relations and good parent adolescent communication

Adolescent Life Stress as a Predictor of Alcohol Abuse And/or Runaway Behavior Thérèse Van Houten, Gary Golembiewski, 1978

Adolescent Psychiatric Nursing Christina R. Hogarth, 1991

Internet Use and Psychological Well-Being Among Children and Adolescents Yangu Pan, Zhaojun Teng, Daniel Tan Lei Shek, Chun Chen, 2024-01-22

Internet use e.g. smartphone use social media use is ubiquitous in our daily lives and plays an increasingly important role in human well-being Today's adolescents and their parents spend significant amounts of time on technological devices such as smartphones especially during COVID-19 In this year new research shows that nearly half of American teenagers say they use the Internet almost constantly 95% of American teens have smartphones and about 54% of teens said it would be somewhat hard to give up social media Hence further research on the relationship between Internet use and psychological well-being among children and adolescents is worth pursuing At the same time a new interest in this area of research is parental technoference which was defined as regular interruptions to real-time face-to-face communications interactions or time spent together among family members because of parental use of technology Technoference has become a common phenomenon in many families with children and evidence has been identified that extended parental time on technological devices e.g. smartphones could have negative effects on parent-child relationships and children's well-being For example parental phubbing is regarded as a typical parental technoference and this term is used widely in some countries around the world which has been demonstrated to be detrimental to their children's developmental outcomes and cause various psychological health problems
