Adrift In The Old World:

Washington Irving and the Fantasy of Masculinity Heinz Tschachler, 2022-02-02 Washington Irving remains one of the most recognized American authors of the 19th century remembered for short stories like Rip van Winkle and The Legend of Sleepy Hollow He also accomplished other writing feats including penning George Washington's biography and other life stories Throughout his life Irving was at odds with socially approved ways of being a man Irving purportedly saw himself and was seen by others as feminine shy and non confrontational Likely related to this he chose to engage with other men's fortunes and adventures by writing defining his male identity vicariously through masculine archetypes both fictional and non fictional Sitting at the intersection of literary studies and masculinity studies this reading reconstructs Irving's life long struggle to somehow win a place among other men Readers will recognize masculine themes in his tales from the Spanish period his western adventures as well as in historical biographies of Columbus Mahomet and Washington In many writings by Irving especially Sleepy Hollow readers will observe themes dominated by masculinity The book is the first of its kind to encompass and examine Irving's writings

Making America / Making American Literature, 2021-11-01 If 1776 heralds America's Birth of the Nation so too it witnesses the rise of a matching and overlapping American Literature For between the 1770s and the 1820s American writing moves on from the ancestral Puritanism of New England and Virginia though not as yet into the American Renaissance so strikingly called for by Ralph Waldo Emerson Even so the concourse of voices which arise in this period that is between and including Benjamin Franklin and James Fenimore Cooper mark both a key transitional literary generation and yet one all too easily passed over in its own imaginative right This collection of fifteen specially commissioned essays seeks to establish new bearings a revision of one of the key political and literary eras in American culture Not only are Franklin and Cooper themselves carefully re evaluated in the making of America's new literary republic but figures like Charles Brockden Brown Washington Irving Philip Freneau William Cullen Bryant the other Alexander Hamilton and the playwrights Royall Tyler and William Dunlop Other essays take a more inclusive perspective whether American epistolary fiction a first generation of American women authored fiction the public discourse of The Federalist Papers the rise of the American periodical or the founding African American generation of Phillis Wheatley What unites all the essays is the common assumption that the making of America was as much a matter of creating its national literature as the making of American literature was a matter of shaping a national identity
