Doing The Rights Thing Rightsbased Development And Latin American Ngos:

Practicing Rights David Androff, 2015-07-03 Social work Codes of Ethics of professional organizations around the world appeal to the concept of people having rights that social workers need to respect and advocate for However it isn't always clear how social workers can actually incorporate human rights based approaches in their practice whether domestic or international This book fills this gap by advancing rights based approaches to social work The first part gives an overview of the relationship between human rights and social work and outlines a model for how rights based approaches can be integrated into social work practice The second part introduces the rights based framework across five mainstream areas of practice poverty child welfare older adults health and mental health Each of these substantive chapters introduces the area of practice and traditional social welfare interventions associated with it outlines relevant human rights frameworks explores case studies showcasing rights based approaches presents practical implications for implementing rights based social work practice The book ends with a discussion of the limitations and criticisms of rights based approaches and lays out some future directions for practice This accessible text is designed for all those interested in learning how to introduce human rights based interventions into their practice It will be of particular use to social work students taking direct practice macro practice social policy international social work and human rights courses as part of their program [Indigenous Rights to the City](#) Philipp Horn, 2019-01-30 This book breaks new ground in understanding urban indigeneity in policy and planning practice It is the first comprehensive and comparative study that foregrounds the complex interplay of multiple organisations involved in translating indigenous rights to the city in Latin America focussing on the cities of La Paz and Quito The book establishes how planning for urban indigeneity looks in practice even in seemingly progressive settings such as Bolivia and Ecuador where indigenous rights to the city are recognised within constitutions It demonstrates that the translation of indigenous rights to the city is a process involving different actor groups operating within state institutions and indigenous communities which often hold conflicting interests and needs The book also establishes a set of theoretical methodological and practical foundations for envisaging how urban indigenous planning in Latin America and elsewhere should be understood studied and undertaken As a process which embraces conflict and challenges power relations within indigenous communities and between these communities and the state This book will appeal to practitioners researchers and students working within the fields of urban planning urban development and indigenous rights **Doing the Rights Thing** Maxine Molyneux, Sian Lazar, 2003 What is rights based development How is it being put into practice in different contexts What is its potential to achieve more equitable and effective development outcomes Governments development agencies and NGOs concerned with poverty alleviation have increasingly sought to integrate rights into their work The term rights based development has been coined to describe these efforts but there is limited understanding of how such approaches are being worked out in practice The authors examine the ways in which rights based strategies have been understood in development

practice in Latin America They stress the political and personal nature of development especially the importance of enabling people to make their own demands of the state and other institutions Rights based development work has involved combining ideas of citizenship democracy participation and empowerment in novel ways This book contributes to the creation of a fuller understanding of this approach to development and reveals the potential that it offers in ongoing efforts to secure more equitable as well as more effective and inclusive development outcomes *The Politics of Rights* Andrea Cornwall,Maxine Molyneux,2013-09-13 Since the late 1990s development institutions have increasingly used the language of rights in their policy and practice This special issue on feminist perspectives on politics of rights explores the strategies tensions and challenges associated with rights work in a variety of settings Articles on the Middle East Africa Latin America East and South Asia explore the dilemmas that arise for feminist praxis in these diverse locations and address the question of what rights can contribute to struggles for gender justice Exploring the intersection of formal rights whether international human rights conventions constitutional rights or national legislation with the everyday realities of women in settings characterized by entrenched gender inequalities and poverty plural legal systems and cultural norms that can constitute formidable obstacles to realizing rights The contributors suggest that these sites of struggle can create new possibilities and meanings and a politics of rights animated by demands for social and gender justice Opening the Black Box Helene Grandvoinet,Ghazia Aslam,Shomikho Raha,2015-04-17 Opening the Black Box Contextual Drivers of Social Accountability fills an important knowledge gap by providing guidance on how to assess contextual drivers of social accountability effectiveness This publication aims to more strategically support citizen engagement at the country level and for a specific issue or problem The report proposes a novel framing of social accountability as the interplay of constitutive elements citizen action and state action supported by three enabling levers civic mobilization interface and information For each of these constitutive elements the report identifies drivers of contextual effectiveness which take into account a broad range of contextual factors e g social political and intervention based including information and communication technologies Opening the Black Box offers detailed guidance on how to assess each driver It also applies the framework at two levels At the country level the report looks at archetypes of challenging country contexts such as regimes with no formal space or full support for citizen state engagement and fragile and conflict affected situations The report also illustrates the use of the framework to analyze specific social accountability interventions through four case studies Sierra Leone Pakistan Yemen and the Kyrgyz Republic **Sustainability and Law** Volker Mauerhofer,Daniela Rupo,Lara Tarquinio,2020-07-07 The book discusses sustainability and law in a multifaceted way Together sustainability and law are an emerging challenge for research and science This volume contributes through an interdisciplinary concept to its further exploration The contributions explore this exciting domain with innovative ideas and replicable approaches It combines a variety of authors from both the public and the private sectors and thereby guarantees a broad view that enshrines the more theoretical arguments from the academic

side as well as stronger practical applicable perspectives The book provides space for thoughtful expansions of established theories as well as the hopeful emergence of innovative ideas Moreover the combination of three to five contributions into the eleven parts respectively aims toward a compression of like minded thoughts This should lead to an intensification of exchange of viewpoints from different angles on a similar theme Readers therefore also have the opportunity to concentrate on single chapters but receive comprised knowledge and a variety of thoughts for new ideas on a particular theme **The Dhaka University Studies** ,2006 **CSO Experiences in Strengthening Rural Poor Organizations in Asia** ,2006
